BUSINESS REVIEW

Terminal Storage Business

The Group owns and operates a liquid product terminal, namely Dongzhou Petrochemical Terminal ("DZIT") carried out by Dongguan Dongzhou International Petrochemical Storage Limited ("DZ International"), an indirect subsidiary of the Company. DZIT is situated in Lisha Island, Humen Harbour district, Shatian county, Dongguan city, Guangdong province, with a site area of approximately 516,000 square metres. It was built with berths ranging from 500 to 100,000 dwt and is installed with 94 oil and petrochemical tanks of a total storage capacity of approximately 260,000 cubic metres, out of which 180,000 cubic metres are specialised for gasoline, diesel and similar petroleum products commonly available in trading and consumption markets. Storage tanks with capacity of 80,000 cubic metres were built for petrochemical products. In addition, the Group has reserved approximately 150,000 square meters of land for the construction of various storage facilities in the future.

業務回顧 碼頭倉儲業務

本集團擁有及經營液體產品碼頭,即由本 公司間接附屬公司東莞市東洲國際石化倉 儲有限公司(「東洲國際」)經營的東洲國際 碼頭(「東洲石化庫」)。東洲石化庫位處廣 東省東莞市沙田鎮虎門港區立沙島,佔地 約516,000平方米,建有可容納介乎500 至100,000噸級泊位,裝備94台油品及石 化產品貯存罐,總庫容為約260,000立方 米,其中180,000立方米專門用於汽油、 柴油及於貿易及消費市場常見類似之石油 產品。80,000立方米的貯存罐建作石化產 品之用。此外,本集團預留約150,000平 方米土地,用於未來建設各類倉儲設備。

Revenue

The terminals earn storage income by leasing their storage tanks to customers based on the storage tank size and category engaged. Apart from this, they collect handling charges when providing services in moving cargoes in and out from the terminals for customers, either by water in the jetties or by road from the loading stations. Furthermore, the terminals provide ancillary services such as tank cleaning and waste treatment to customers and earn respective fees for the services rendered.

Key Performance Indicators

The leaseout rates and cargo throughput are the major key performance indicators of the terminals. Assume that the unit rate remains the same, higher leaseout rate should return with higher storage income. More cargoes flows mean more works in the terminals thus more handling fee income. The leaseout rates and cargo throughput of DZIT during the last two years are as follows:

收入

該碼頭向客戶出租貯存罐,根據客戶所租 賃之貯存罐大小及品種賺取貯存收入。除 此之外,彼等於向客戶提供貨物進出碼頭 (於碼頭經水路或自裝車台經陸路)的服務 時收取服務費。此外,碼頭向客戶提供配 套服務,例如貯存罐清潔及廢品處理,並 就所提供服務收取相關費用。

主要表現指標

出租率及貨運量為碼頭的主要表現指標。 假設單位價格保持不變,出租率愈高,貯 存收入回報愈大。貨運量愈多意味著碼頭 工作量較大,因此服務費收入亦更高。於 過去兩個年度,東洲石化庫的出租率及貨 運量如下:

The major operational statistics of DZIT in 2021 declined were mainly affected by the impact of the consumption tax on some oil and petrochemical products and the pressure of the relocation of factories by the customers. Despite that the Group introduced some high-quality new customers in some local state-owned enterprises at the beginning of the year which mainly store refined oil products and pick up cargos by vessels that drove the number of domestic vessels visited increased by 53.5% as compared to last year, China government began to levy consumption tax on some products during the year, that resulted in the reduction in the number of trucks served to pick up cargoes. Coupled with certain customers plan to relocate factories and reduce the production, the Group's overall transshipment volume and terminal throughput decreased by 58.7% and 11.7% respectively as compared to the last year. During the year, the average leaseout rate for both oil and petrochemical tanks maintain was 97.8%, representing a slight decrease of 0.7 percentage points over the last year.

Trading Business

The Group operates in trading of oil and petrochemical products carried out in the People's Republic of China (the "PRC") and Hong Kong. Shanghai Diyou Industry Co., Ltd. ("SHDY"), an indirect subsidiary of the Company, is principally engaged in trading of oil and petrochemical products and holds a refined oil wholesale operating licence issued by the Ministry of Commerce of the PRC and is also a qualified supplier for major energy companies such as CNOOC, Sinopec etc. Besides, SHDY actively develops and expands the end customers of filling stations and provides petrol and diesel supplies to third party filling stations during the year. The Group has further expanded the trading business carried out by the Group's subsidiary in Hong Kong to increase the Group's customer base and business scale during the year.

The operational statistics of trading business during the last two years are as follows:

東洲石化庫於二零二一年的主要營運統計 數字有所下跌,主要受到部份油品及石化 產品徵收消費税的影響及客戶搬遷廠房所 帶來的壓力。儘管本集團在年初引進若干 優質的本地國有企業新客戶,該等企業以 貯存成品油及裝卸貨船為主,帶動本地國 岸船隻數量較去年增加53.5%,但中國政 府在年內開始對部份產品徵收消費税,導 致接收貨物的貨車數量減少。再加上若干 客戶計劃搬遷廠房及縮減生產,使本集團 的整體轉輸量及庫區吞吐量分別較去年減 少58.7%及11.7%。年內,油品及化工品 貯存罐的平均出租率為97.8%,較去年微 降0.7個百分點。

貿易業務

本集團於中華人民共和國(「中國」)及香港 經營油品及石化產品貿易。上海迪友實業 有限公司(「上海迪友」),為本公司的間接 附屬公司,主力從事油品及石化產品買 賣,持有中國商務部發出的《成品油批發經 營批准證書》,以及是中國海油、中國石化 等大型能源公司的合資格供應商。此外, 上海迪友於年內大力發展及開拓加油站終 端客戶群,向第三方加油站提供汽柴油供 應。年內本集團進一步拓展本集團在香港 附屬公司開展的貿易業務,以增加本集團 的客戶群和業務規模。

過去兩個年度貿易業務的營運數據如下:

Operational statistics 營運統計數字		2021 二零二一年	2020 二零二零年	Change % 變化%
Number of sale contracts entered 已訂	「立銷售合同數目	93	118	-21.2

(Expressed in Hong Kong dollars unless otherwise indicated) (以港元列示,另有註明者除外)

During the year, China government began to levy consumption tax on some refined oil products such as light cycle oil, mixed aromatics and diluted asphalt, which hindered the Group's expansion of light cycle oil trade business. In addition, as China strengthened the supervision of taxation on the upstream and downstream distribution of refined oil products, the market price became more transparent and the price difference between the north and the south shrank. As a result, SHDY reduced its back-to-back orders considerably during the year, leading to a decrease of over 25% and 50% in the number of sales contracts entered into and sales volume respectively during the year. In order to improve unit profit and minimize the impact of the consumption tax on the sale volumes, the Group changed its business strategies, and vigorously expanded and developed the end customers of filling stations, which not only facilitated SHDY's business operations to bring into play the advantages of centralised procurement, reduced procurement cost and gained stable profit through the way of centralised procurement, retail and wholesale, but also helped to enhance the market risk resistance and obtain higher profit by leveraging on market price fluctuation. Besides, the Group actively expanded its import trade to drive the trading business carried out by the Group's subsidiary in Hong Kong. During the year, the Group entered into 93 sales contracts with a total sales volume of approximately 447,000 metric ton.

Retail Business

The Group owns a filling station which was situated in Zengcheng district, Guangzhou city, the PRC with a site area of approximately 12,500 square metres. Its floor area, fuel island configuration, equipment level and construction standards all meet the standards of local flagship filling stations. The filling station has commenced its operations since April 2020 and in order improve the operational efficiency, during the year was leased out to an independent third party by the Group for rental income. The Group actively expands its share of the refined oil retail market by increasing its business segments through various means, including but not limited to leasing, signing of key fuel supply agreement and providing brand management services. Currently, there are eight filling stations under the brand "Hans Energy" located across Guangdong Province and Guangxi Province in the PRC.

年內,中國政府對輕質循環油、混合芳 烴、稀釋瀝青等部分成品油產品開始徵收 消費税,導致本集團拓展的輕質循環油貿 易業務受阻。加上中國加強對成品油產品 上下游流通環節的税收監管,使市場價格 愈加透明,南北價差收縮,令上海迪友於 年內減少不少背靠背訂單,導致年內訂立 的銷售合同數目及銷量分別減少超過25% 及50%。為提高單位利潤以及減少消費税 對銷量的影響,本集團改變經營策略,大 力開拓及發展加油站終端客戶,這不但有 利於上海迪友營運業務發揮集中採購的優 勢,降低採購成本,通過集中採購、零售 及批發的方式獲得穩定的利潤,而且有助 提高市場抗風險能力,利用市場價格波動 獲得更高的收益。除此之外,本集團積極 拓展進口貿易,帶動本集團香港附屬公司 的貿易業務。年內,本集團共簽訂93份銷 售合同,總銷量約為447,000公噸。

零售業務

本集團擁有一所加油站,該加油站位處中 國廣州市增城區,佔地約12,500平方米。 其佔地面積、加油島設置、設備水平及建 設標準等各方面均達到本地區旗艦加油站 的水準。該加油站於二零年四月開始 營運,為提高營運效益,年內本集團把加 油站租予一名獨立第三方經營,以收取租 金收入。本集團積極擴大成品油零售市場 的份額,透過不同形式,包括但不限於租 賃、簽訂主要燃料供應協議及提供品牌管 理服務等方式,以增加其業務板塊。目前 「漢思能源」品牌加油站數目已達八家,分 佈中國廣東省及廣西省。 (Expressed in Hong Kong dollars unless otherwise indicated) (以港元列示,另有註明者除外)

During the year ended 31 December 2021, the Group's total revenue decreased from \$2,481.9 million to \$1,972.4 million, a decrease by 20.5% as compared to the last year. During the year, total revenue from sales of oil and petrochemical products was \$1,791.1 million, accounting for 90.8% of the Group's total revenue, decreased by 22.1% as compared to the last year. The decrease was mainly attributable to the decrease in the number of sales contracts entered and sale volume in SHDY as a result from the consumption tax on some refined oil products imposed by China government at the beginning of the year. During the year, revenue from the provision of terminal, storage and transshipment activities for liquid chemicals products in DZIT was \$168.0 million, a slightly increase by 2.2% on a year basis. The increase was mainly attributable to the appreciation of average exchange rate in Renminbi yuan ("RMB") during the year. Excluding the appreciation effect, revenue from the provision of terminal, storage and transshipment activities for liquid chemicals products in DZIT decreased by about 4.7% during the year. The decrease was mainly attributable to the impact of the consumption tax on some oil and petrochemical products by China government and the relocation factories by some customers that reduced the Group's overall transshipment volume and terminal throughput during the year. Revenue from operating a filling station decreased from \$18.4 million to \$13.3 million, a decrease by 27.7% on a year basis. The decrease was mainly attributable that the Group leased out the filling station to an independent third party for rental income from August 2021, resulting that retail revenue from operating a filling station only accounted for seven months during the year.

截至二零二一年十二月三十一日止年度, 本集團總收入由24.819億元下跌至19.724 億元,較去年減少20.5%。年內,總銷售 油品及石化產品的收入為17.911億元, 佔本集團總收入的90.8%,較去年減少 22.1%。下跌主要由於中國政府於年初對 部份成品油產品開徵消費税,致上海迪友 訂立的銷售合同數目及銷量減少。年內, 東洲石化庫就提供液體化學品之碼頭、貯 存以及轉輸業務的收入為1.680億元,按 年微增2.2%。增加乃主要由於年內人民 幣(「人民幣」)平均匯率升值。撇除升值的 影響,東洲石化庫就提供液體化學品的碼 頭、貯存以及轉輸業務收入於年內下跌約 4.7%。收入減少主要是由於中國政府對部 分油品及石化產品徵收消費税所帶來的影 響,以及若干客戶搬遷廠房,減少了本集 團年內的整體轉輸量及碼頭吞吐量。經營 加油站的收入由1,840萬元減少至1,330萬 元,按年減少27.7%。減少主要由於本集 團從二零二一年八月起把加油站租予一名 獨立第三方經營,以收取租金收入,導致 年內來自經營加油站的零售收入僅佔七個 月。

(Expressed in Hong Kong dollars unless otherwise indicated)(以港元列示,另有註明者除外)

OUTLOOK

The Group's overall operating profit continued to improve in 2021. While operating income maintained its growth, net assets of the Company increased significantly as a result of appreciation of financial investments. This reflects that the Group's diversification has begun to play a positive role. On this basis, it is expected that the Group will achieve better operating results and greater profitability in the coming year.

Actively promoting new terminal storage construction projects

In 2022, the Dongzhou Petrochemical storage facilities will continue to maintain a high leaseout rate to ensure the continued stability and growth of revenue from the terminal storage business. The new structure of project companies and the shareholding allocation plan have been agreed with corresponding parties for the second phase of the Dongzhou Petrochemical project in 2021, namely, the construction of liquefied natural gas ("LNG") contingency peak adjustment storage, gasification and transmission facilities on the existing reserve land and corresponding modifications to ancillary facilities to the terminal. We are now making the every effort to push the process of the project approval works from the local government to complete as soon as possible. Since the handling and storage charges for LNG and other liquefied gases are several times higher than those for oil and liquid chemicals, the completion of this project will significantly increase the revenue and profitability of Dongzhou Petrochemical.

Continuing to develop the trading and retail business

In 2021, the international trading business operated by the Group's Hong Kong subsidiary commenced, which compensated for the decline in trading volume of the domestic refined oil products due to the influence of China's policies and market price fluctuations, leading to an increase in the overall trading volume and gross profit of the Group. In 2022, the Group will continue to expand its scale of operation by exploring new trading customers and product categories. For the filling station business, the Group adjusted its business model by leasing out its self-operated filling station assets to an independent third party, which freed itself from the tedious daily management and operation of the retail segment, and focused on expanding its market share through the signing of fuel supply agreements and providing brand licensing franchises. Through this approach, the number of franchised filling stations under the brand "Hans Energy" reached eight as of the end of 2021. In 2022, the Group will continue to sign new franchising agreements to expand its share in the refined oil retail market.

展望

二零二一年本集團整體經營溢利繼續保持 增長的同時,金融投資增值帶來的公司資 產淨值顯著增加。反映出本集團開展多元 化經營的優勢開始發揮積極作用。在這個 基礎上,可以預見本集團在新的一年將取 得更好的經營業績和更大的收益。

積極推進新的碼頭倉儲建設項目

二零二二年東洲石化倉儲設施將持續維持 高出租率,保證碼頭及倉儲業務收入繼續 穩定和增長。二零二一年東洲石化二期建 設項目(即在現有儲備土地建設液化天然氣 (「LNG」)應急調峰庫、氣化及轉輸設施及 相應的碼頭配套改造)已與各合作方完成了 項目公司架構及股權分配方案的談判。目 前正在全力推動地方政府方面的立項審批 工作儘早完成。由於LNG等液化氣體裝卸 及倉儲收費是數倍於油品和液體化工品, 這一項目建設完成後,將大幅度提升東洲 石化的收入和盈利。

繼續開拓貿易及零售業務

二零二一年,本集團香港附屬公司開展的 國際貿易開始起步,彌補了國內成品油貿 易受到中國政策影響及市場價格波動造成 的數量有所下降的缺口,帶動本集團整體 貿易數量及毛利均有增長。二零二二年將 在去年的基礎上,繼續開拓新的貿易客戶 及品種,繼續擴大經營規模。在加油站業 務方面,本集團調整了業務模式,將自營 的加油站資產出租予獨立第三方經營,使 集團從零售業繁瑣的日常管理和經營中解 脱出來,並通過簽訂供油協議及品牌授權 的加盟方式,集中精力擴大市場份額。截 至於二零二一年底止,通過這種方式,「漢 思能源」品牌的加盟油站已經達到八家。二 零二二年本集團仍會繼續簽約新的加盟油 站,擴大成品油零售市場份額。

New energy industry is an important investment direction for the Group

At the end of 2021, the Group completed the Tranche 1 subscription of the shares in Bravo Transport Holdings Limited ("BTHL"), the parent company of New World First Bus Services Limited ("NWFB") and Citybus Limited ("Citybus"). The Tranche 2 Completion took place on 28 March 2022, and immediately after the Tranche 2 Completion, the Group acquired a total of 7% of the entire issued share capital of BTHL. Thereafter, the Group holds approximately 15.56% of the entire issued share capital of BTHL. The principal considerations for the increased investment in BTHL are as follows: on the one hand, the bus companies are good investment targets because of their stable cash income and huge appreciation potential. On the other hand, to act in concert with the HKSAR government's goal of achieving carbon neutrality, NWFB and Citybus propose to develop hydrogen fuel cell buses plan. This is highly consistent with the strategic intent underlying one of Hans Energy's future development directions of exploring new energies (especially hydrogen energy) supply chain related business, which will enable realization of mutual benefits and synergized development. In 2022, the Group will increase its research and investment in the hydrogen energy supply chain field and strive to screen out hydrogen energy supply and storage projects that can be used in Hong Kong, and provide fuel supply solutions for the introduction and promotion of the use of hydrogen fuel cell buses and other hydrogen fuel vehicles in Hong Kong, thereby contributing to the achievement of the goal of "Carbon Neutral" in Hong Kong.

新能源產業是集團未來重要的投資方向

二零二一年底,本集團完成第一批增持 新世界第一巴士服務有限公司(「新巴」) 及城巴有限公司(「城巴」)的母公司Bravo Transport Holdings Limited([BTHL])公司股 份,第二批於二零二二年三月二十八日完 成,緊隨第二批完成後,本集團合共增持 BTHL全部已發行股本的7%,此後,本集 團持有BTHL全部已發行股本約15.56%。 增加對BTHL投資的主要考慮如下:一方面 是因為巴士公司有穩定現金收入以及巨大 的升值潛力,是良好的投資對象;另一方 面新巴城巴,配合香港特區政府實現「碳中 和」的目標,提出發展氫能源巴士的計劃, 這與漢思能源將發展新能源特別是氫能供 應鏈相關業務作為未來發展方向之一的戰 略意圖高度一致,可實現相互促進,同步 發展的效益。二零二二年本集團將加大氫 能源供應鏈方面的研究和投入,爭取篩選 出可立足香港本地的氫能供應及儲運項 目,為香港引進和推廣使用氫能燃料電池 巴士車及其他氫能車輛提供燃料供應解決 方案,為香港實現「碳中和」目標盡一份責 任。

During the year, the Group's EBIT was approximately \$46.8 million (2020: \$11.6 million), increased by 304.9% over the last year. The increase was mainly attributable to the increase in net fair value gains on financial assets at fair value through profit or loss ("FVPL") by approximately \$73.4 million, and increase of gross profit by approximately \$38.0 million offset by the increase in loss allowance of trade and other receivables of approximately \$13.7 million and increase of equity settled share-based payment expenses by approximately \$56.0 million. Finance costs

During the year, finance costs amounted to \$54.9 million (2020: \$49.9 million) which were mainly incurred on the Group's outstanding bank loans. EXPOSURE TO FLUCTUATION IN EXCHANGE RATES AND PRICES AND RELATED HEDGE

The Group's cash and cash equivalents are held predominately in HK dollars, RMB and US dollars. Operating outgoings incurred by the Group's subsidiaries in the PRC are mainly denominated in RMB, which usually receives revenue in RMB as well. Management considers that the Group exposed to fluctuation in exchange rates are not significant. Prices of oil products are affected by a wide range of global and domestic factors which are beyond the control of the Group. The fluctuations in such prices may have favourable or unfavourable impacts on the Group. However, the Group mainly operated on a back-to-back sale and purchase model and has been vigorously developing the establishment of end customers of filling stations (including branded filling stations) to reduce procurement costs by centralising procurement, retail and wholesale, which not only prevents risk of oil price fluctuations but also enhances profitability. Accordingly, management is in the opinion that the Group's exposure to foreign exchange rate and price risks are not significant, and hedging by means of derivative instruments is considered unnecessary.

Save for the above disclosed, there was no other significant risks of exchange rates and price during the year ended 31 December 2021.

Practices and Conduct of Meetings

Notices of regular Board meetings are served to all Directors at least 14 days before the meetings. For other Board and committee meetings, reasonable notice is generally given.

Agenda and Board papers together with all appropriate, complete and reliable information are sent to all Directors at least 3 days before each Board meeting or committee meeting to keep the Directors apprised of the latest developments and financial position of the Company and to enable them to make informed decisions. The Board and each Director also have separate and independent access to the senior executives whenever necessary.

Company Secretary is responsible to take and keep minutes of all Board meetings and committee meetings. Draft minutes are normally circulated to Directors for comment within a reasonable time after each meeting and the final version is open for Directors' inspection.

According to current Board practice, any material transaction, which involves a conflict of interests for a substantial shareholder or a Director, will be considered and dealt with by the Board at a duly convened Board meeting. The Company's memorandum and articles of association also contain provisions requiring Directors to abstain from voting and not to be counted in the quorum at meetings for approving transactions in which such Directors or any of their associates have a material interest.

A. ENVIRONMENTAL ASPECTS

Based on ISO14001, the standard of management system for environment, the Group has established a set of management systems regarding environmental protection, including but not limited to "Atmosphere Pollution Management System", "Waste Management System" and "Wastewater Management System".

The Group's objectives on environmental protection are to eliminate and reduce the impact of its operation on the ecological environment and endeavours to save resources and protect the environment. The Group is in strict compliance with the "Environmental Protection Law of the People's Republic of China" and other relevant laws and regulations, and had no material non-compliance regarding environmental issues during the reporting period.

A1. EMISSIONS

Air Pollutants Emission

Emission control is essential for mitigating the impact on the environment and protecting the health of employees. The Group's emission complies with "Emission Limits of Air Pollutants (DB44/27-2001)" (大氣污染物排放限值) and "Emission Standard of Air Pollutant for Bulk Gasoline Terminal (GB 20950-2007)" (儲油庫大氣污染物排放標準). The decrease in air pollutants emission in 2021 was mainly attributable to less frequent business travels and transportation by vehicles, the use of gasoline recovery device, the volatilized gasoline was collected, resulting in the decrease in pollutants emission as well as effective implementation of fuel saving strategies by our terminals during the year. Furthermore, the Group targets to reduce the emission of air pollutants by 10% by 2025. The air pollutants emission during the reporting period is as follows:

A. 環境層面

根據ISO14001(環境管理體系標準), 本集團已建立一套環保管理系統,包 括但不限於「大氣污染管理系統」、 「廢棄物管理系統」及「污水管理系 統」。

本集團的環保目標是消除及減低其營 運對生態環境的影響,並盡力節約資 源及保護環境。本集團嚴格遵守《中 華人民共和國環境保護法》及其他相 關法例及法規,於報告期間並無有關 環境事宜的重大不合規。

A1. 排放物

大氣污染物排放

控制排放對減低對環境的影響及保障 僱員健康至關重要。本集團的排放物 符合「大氣污染物排放限值(DB44/27-2001)」及「儲油庫大氣污染物排放標 準(GB 20950-2007)」。二零二一年 大氣污染物排放量減少乃主要由於年 內使用汽車的商務差旅和交通行程較 不頻繁,碼頭倉儲業務啟用了油氣回 收裝置,將揮發的油氣收集,減少污 染物排放,以及碼頭有效實施節省燃 油策略。此外,本集團以二零二五年 前減少10%的大氣污染物為目標。 於報告期間大氣污染物排放的情況如 下:

			Trading and	Terminal		
Air Pollutants		Unit	retail business	storage business	2021	2020
大氣污染物		單位	貿易及零售業務	碼頭倉儲業務	二零二一年	二零二零年
Nitrogen oxides (NO _x)	氮氧化物(NO _x)	kg千克	1.65	1,532.62	1,534.27	2,487.34
Sulfur dioxide (SO ₂)	二氧化硫(SO ₂)	kg千克	0.28	33.66	33.94	44.72
Particulate matter (PM)	懸浮粒子(PM)	kg千克	0.27	163.11	163.38	249.79

As most of the products stored are highly volatile, the Group has implemented "VOCs One Enterprise One Policy Comprehensive Improvement Program" (VOCs 一企一策綜合整 治方案) to control volatile organic compounds (VOCs) emission from source and production processes. Key measures to mitigate the leakage of the volatile chemicals are implemented as follows:

- External floating roof tanks¹ are used to store gasoline, diesel and other volatile chemical products.
- Nitrogen blanketing² is used in the tanks to ensure stored product is separated from the air, vapour generated in the tank is collected and treated with activated carbon.
- To reduce the non-methane hydrocarbon (NMHC) emission, oil-gas condensation recovery devices are installed to achieve a recycling rate of 98%.
- All the volatile organic compounds (e.g., gasoline, alkane solvents) are stored in specific containers and sealed properly to avoid leakage.
- Using gasoline recovery device to collect volatilized gasoline, the recovery ratio is over 95%, in order to reduce air pollutants emission.

Apart from measures adopted to reduce VOCs, the Group lowers the emission of SO₂ by using low-sulfur diesel (National VI standard) for the boiler.

由於大部分儲存產品均非常容易揮 發,本集團已實施「VOCs一企一策 綜合整治方案」,從源頭及生產過程 控制易揮發有機化合物(VOCs)的排 放。減低易揮發化學品洩漏的關鍵措 施實行如下:

- 使用浮頂式貯存罐1儲存汽油、 柴油及其他易揮發化學品。
- 在貯存罐使用氮封裝置²,確保 儲存產品與空氣隔絕,收集貯 存罐內產生的蒸氣及以活性碳處 理。
- 為減少非甲烷碳氫化合物排放, 安裝油汽冷凝回收裝置, 達到 98%回收率。
- 所有易揮發有機化合物(如汽 油、烷烴溶劑)儲存於特定儲存 器及妥善密封以避免洩漏。
- 使用油氣回收裝置將揮發的油氣 收集,油氣回收率達95%以上, 以減少大氣污染物排放。

除採取減低易揮發有機化合物的措施 外,本集團透過於鍋爐使用低硫柴油 (國家第六期標準)以減低二氧化硫的 排放。

1 External floating roof tanks (浮頂式儲存罐) are storage tanks commonly used to store large quantities of petroleum products. 的儲油罐。

They eliminate breathing losses and greatly reduce the evaporative loss of the stored liquid.

Greenhouse Gas ("GHG") Emission³

Climate change is gradually concerned by the community. The Group manages the carbon neutral by minimising the energy consumption and water consumptions as these activities cause significant emission of greenhouse gas. Policies and procedures adopted on resources saving are mentioned in the section "Use of resources". With a sense of promoting the use of clean energy and green environment, the Group has switched its fuel consumption to fossil fuel with lower carbon content such as Liquefied Petroleum Gas ("LPG"). The decrease in GHG scope 1 emission in 2021 was mainly due to the reduction in business travels and transportation by vehicles, as well as effective implementation of fuel saving strategies by our terminals during the year. In light of the increase in the usage of boiler for terminal storage business, leading to increase in consumption of low-sulfur diesel, the GHG scope 2 emission increased in 2021. The Group will strive to reduce the emission of GHG by 10% by 2025.

溫室氣體(「溫室氣體」)排放3

社區日益關注氣候變化。本集團減少 能源消耗及用水量以管理碳中和,因 為該等活動導致大量排放溫室氣體。 所採納資源節約政策及程序載於 [資 源使用」一節。為促進清潔能源的使 用及改善生態環境,本集團已將其燃 料消耗轉向液化石油氣(「LPG」)等低 碳石化燃料。二零二一年溫室氣體範 **圍1**排放減少乃主要由於年內使用汽 車的商務差旅和交通行程減少,以及 碼頭有效實施節省燃油策略。鑒於碼 頭倉儲業務於年內啟用鍋爐使用量增 加,使低硫柴油消耗量增大,令二 二一年溫室氣體範圍2排放有所增 零_ 加。本集團將致力在二零二五年前將 溫室氣體排放減少10%。

Hazardous and Non-hazardous Wastes

Wastes generated are handled with a comprehensive procedure to mitigate the impact to the environment. The Group has a strict classification system for different types of wastes. Each type of waste has specific storage location and collection procedures. There is a precaution implemented for the leakage of waste to prevent pollution.

Hazardous wastes such as hazardous wastewater, waste oil cleaning rag and organic solvents are handled according to the latest policies of "National Hazardous Waste Inventory". These wastes are separately stored and handled with ledger for record. The Group engages qualified recycling companies to perform waste disposal and treatment so as to minimise the impact on the environment.

During the year, the effective implementation of hazardous waste management strategies led to a decrease in the amount of hazardous waste generated in 2021. The Group has set comprehensive reduction target by 10% reduction in hazardous waste generation by 2025.

The hazardous wastes generated by the Group during the reporting period are as follows:

有害及無害廢棄物

所產生的廢棄物透過全面程序處理以 減低對環境影響。本集團對不同廢棄 物類型設有嚴格分類制度。各類廢棄 物有指定的存放地點及收集程序。已 對廢棄物洩漏實施預防措施以防止污 染。

有害廢棄物(如有害污水、廢棄去油 布及有機溶劑)根據《國家危險廢棄物 名錄》的最新政策處理。該等廢棄物 獨立儲存及使用分類簿記處理,以作 記錄。本集團委聘合資格回收公司負 責廢棄物棄置及處理,以減低對環境 的影響。

年內,有效實施有害廢棄物管理策略 導致二零二一年產生的有害廢棄物數 量減少。本集團已設立全面減排目 標,旨在於二零二五年前將有害廢棄 物數量減少10%。

於報告期間本集團產生有害廢棄物的 情況如下:

The Group has put effort on waste-free initiatives in reducing non-hazardous waste. The Group has launched waste recycling and implemented different measures to reduce the wastes generated in the office. For example, used paper and plastic materials are collected in the office for recycling purpose. Waste electrical and electronic equipment is separately collected. With these measures, the Group hopes to ease the pressure on landfill space and bring benefits to the environment. The amount of non-hazardous waste generated in 2021 remained stable. The Group has set comprehensive reduction target by 10% reduction in non-hazardous waste generation by 2025. 本集團致力推行減少無害廢棄物的零 廢棄物倡議。本集團已推動廢棄物回 收和實行不同措施以減低辦公室產生 的廢棄物。例如在辦公室收集已用的 紙張及塑膠材料,以作回收用途。 電器及電子設備分開收集。本集團期 望藉著該等措施紓緩堆填區的壓力及 為環境帶來益處。二零二一年產生的 設立全面減排目標,旨在於二零二五 年前將無害廢棄物數量減少10%。

Wastewater

The terminal and warehouse areas are equipped with drainage system to collect wastewater. Impermeable layers are applied to all pipes and treatment facilities to avoid leakage of wastewater. Rainwater and wastewater are collected by two separate systems to prevent pollution to groundwater.

The Group also cooperated with the Environment Faculty of South China University of Technology (華南理工大學環境 學院) to develop a sewage treatment facility, which treats wastewater with microorganisms. During this year, around 4,980.00 m³ (2020: 17,479.70 m³) of wastewater was discharged and treated. After the treatment, the water which meets satisfactory quality standard, is used in fire services and planting. Not only the emission of wastewater to land and water bodies is reduced, but also the water can be reused to save the water resource. This system is simple and the cost of maintenance and operation is low. Therefore, it is widely admired and accepted by government departments and peers.

Noise

Noise is mainly generated from the operations of blower of boilers, pumps and compressors, etc. Appropriate acoustic insulation is applied to those machines. Regular maintenance is also conducted as to reduce the noise generated due to wearing of the components in those machines.

A2. USE OF RESOURCES

The Group has adopted policies and guidelines to improve the efficiency in energy, water and other material consumption, including "Energy Saving Management System".

Energy

The energy consumption of the Group mainly comes from fossil fuels and electricity. The Group promotes the idea of "green office" to reduce the electricity consumption as follows:

- The temperature in the office is set at 26 Degree Celsius in summer.
- No heating is supplied in winter according to the characteristic of weather in South China.

污水

碼頭及倉庫地區設有排污系統以收集 污水。所有管道及處理設施備有不滲 水層,防止污水洩漏。雨水及污水使 用兩個獨立系統收集,以防止污染地 下水。

本集團亦與華南理工大學環境學院合 作開發污水處理設施,其使用微生物 處理污水。於本年度,污水排水及處 理量約為4,980.00立方米(二零二零 年:17,479.70立方米)。於處理後, 符合良好品質標準的水會用於消防服 務及種植。這不僅減少向陸地及水體 排放污水,而且可再用水以節省水資 源。該系統簡單且維護及運作成本 低,因此廣獲政府部門及同業賞識及 接納。

噪音

噪音主要源於鍋爐鼓風機、泵和壓縮 機等的運作。該等機器備有適當隔音 裝備,亦需定期維護,減少因該等機 器的部件損耗而產生的噪音。

A2. 資源使用

本集團已採納政策及指引提升能源、 水及其他物料的消耗效益,包括「節 能管理系統」。

能源

本集團能源消耗主要來自化石燃料及 電力。本集團推廣「綠色辦公室」概 念,以減低電力消耗,詳情如下:

- 夏天時辦公室的溫度設定為攝氏
 26度。
- 根據華南地區天氣的特點,冬天 不會提供暖氣。

- All electronic appliances have to be switched off when leaving the office.
- After all staff leave the office, security guards double check the electronic appliances and ensure all of them are switched off.

The Group also checks the oil usage frequently to minimise the chances of oil leakage which lead to energy wastage.

In light of using the gasoline recovery device, the volatilized gasoline was collected and re-transformed to gasoline for the terminal storage business, resulting in the purchased electricity consumption increased in 2021. The decrease in both petrol and diesel consumption in 2021 was mainly attributable to the reduction in business travels and transportation by vehicles, as well as effective implementation of fuel saving strategies by our terminals during the year. The Group has set inclusive total energy consumption reduction target by 10% by 2025. During the year, the energy consumptions are as follows:

- 離開辦公室時須關掉所有電器。
- 所有員工離開辦公室後,保安人員須複查電器,確保所有電器均已關掉。

本集團亦會經常檢查用油情況,盡量 減低漏油的機會,以免浪費能源。

鑒於碼頭倉儲業務啟用了油氣回收裝 置,將揮發的油氣收集,重新轉變為 汽油,二零二一年購買電力的消耗量 有所增加。二零二一年汽油及柴油消 耗量均減少,乃主要由於年內使用汽 車的商務差旅和交通行程減少,以及 碼頭有效實施節省燃油策略。本集團 已設立目標,旨在於二零二五年前將 能源消耗總量減低10%。年內能源消 耗情況如下:

Energy Type 能源種類		Unit 單位	Trading and retail business 貿易及零售業務	Terminal storage business 碼頭倉儲業務	2021 二零二一年	2020 二零二零年
Purchased electricity	購買電力	MWh千個千瓦時	133.81	5,712.50	5,846.31	3,433.86

Water

Water is another important resource used for the daily operation. In order to monitor the usage of water, meters are installed in different locations and water consumption is recorded regularly. Staff are responsible for managing the water usage and checking the water system. If leakage of water pipe happens, repair will be immediately carried out to reduce the wastage of water resource.

In the workplace, the water pressure is adjusted according to the actual water usage. To encourage water-saving, water usage of each staff in the staff quarter is recorded and the staff has to pay water bills by themselves. Owing to the times of cleaning the storage tanks increased for the terminal storage business, the water consumption increased in 2021. The Group has set a reduction target of 10% in water consumption by 2025. The water consumption during the reporting period is as follow:

水

水是用於日常營運的另一重要資源。 為監察用水量,水錶已在不同地點安 裝,定期記錄用水量。員工負責管理 用水及檢查水系統。倘水管發生洩 漏,將即時進行維修,以減少水資源 的浪費。

工作場所的水壓根據實際用水量調節。為鼓勵節約用水,會記錄員工總部每名員工的用水,員工須自行支付水費。由於碼頭倉儲業務清洗貯存罐的次數增加,二零二一年水消耗量增加。本集團已設立目標,旨在於二零二五年前將水消耗量減低10%。於報告期間水消耗情況如下:

Water Consumption 水消耗		Unit 單位	Trading and retail business 貿易及零售業務	Terminal storage business 碼頭倉儲業務	2021 二零二一年	2020 二零二零年
Water consumption	水消耗量	m³立方米	878	99,127	100,005	84,643

Nitrogen

Nitrogen is an important resource for facilitating the storage of highly volatile substances. It provides a protective layer of gas on the substances, which is named as blanketing. The process is controlled automatically instead of manually to avoid wastes. The usage of nitrogen is monitored to ensure there is no leakage.

氮

氮是有助儲存極容易揮發物質的重要 資源。其在物質上添上氣體保護層, 稱為氮封裝置。該程序乃自動而非人 手控制,以免浪費。氮用量獲監察, 確保並無洩漏。

A3. THE ENVIRONMENT AND NATURAL RESOURCES

The Group's terminal is near to the waterbody with high biodiversity and rich fisheries resources. Based on the Group's internal policies, efforts have been made to minimise the impact of activities on the environment. For example, two sets of oil spill monitoring and alerting system have been installed in the water body near the terminal. The system is able to detect oil spill accidents occurred when the oil tanker is berthing or oil products are loaded.

Our terminals are also monitored by staff under 24-hour realtime video surveillance system. If oil spill accidents are detected, the signal from the alarm system can reach the responsible staff and prompt remedies can be carried out to reduce the impact on the environment.

To strength the pollution control, the Group has cooperated with a company specialised in handling oil spill accidents to equip adequate facilities (e.g., oil boom) to prevent the spread of oil leakage in the sea.

A4. CLIMATE CHANGE

Governance

Our group addresses climate-related risks based on the nature of the risk to our operations. The physical impacts of climate change, including extreme weather events, or damage to facilities have immediate operational impacts and are treated as operational risks. Long-term challenges, such as emerging ESG issues and climate-related risks and opportunities, may be discussed by the Group's ESG Working Group.

Supported by our ESG Working Group, our Board oversees climate-related issues and risks regularly during board meetings and ensures that they are incorporated into our strategy.

A3. 環境及天然資源

本集團的碼頭鄰近水域,生態多樣性 甚高及魚類資源豐富。根據本集團的 內部政策,已致力減低業務活動對環 境的影響。舉例而言,鄰近碼頭的水 域已安裝兩組漏油監察及警報系統。 在油輪靠岸或卸載油品時,系統能偵 測是否發生漏油意外。

員工亦會以24小時實時錄像監視系統 監察碼頭。倘發生漏油意外,警報系 統會傳達訊號予負責員工,並採取迅 速補救措施,降低對環境之影響。

為加強污染監控,本集團與專門處理 漏油意外的公司合作,以配備充分設 施(如攔油索),避免海上漏油擴散。

A4. 氣候變化

管治

本集團按營運風險的性質來處理氣候 相關的風險。氣候變化包括極端天氣 事件的實際影響,或設施遭到破壞會 即時影響營運,並視為營運風險處 理。本集團的環境、社會及管治工作 小組會討論長遠挑戰,比如新出現的 環境、社會及管治事宜、與氣候相關 的風險及機遇。

在環境、社會及管治工作小組的支持 下,董事會在董事會會議上定期監督 與氣候有關的事宜及風險,並確保其 被納入我們的策略。 To ensure our Board to keep up with the latest trend of climate-related issues, climate competence training will be provided to ensure it has the necessary expertise and skills to oversee the management of climate-related issues. Our Board also seeks professional advice from external experts when necessary to better support the decision-making process.

Our ESG Working Group provides effective governance for integrating and addressing ESG issues, including climate change, within our business. The ESG Working Group is responsible for approving operational emissions targets for the Group and commissioning an ESG benchmarking, as well as gap analysis exercise to identify gaps in both disclosure and policy relative to the best practice standards. Moreover, the ESG Working Group works closely with the Group's different operation departments, with an aim to develop consistent and enhanced approaches on addressing ESG risk issues and report to the management.

Strategy

Climate change risk forms part of our overall risk profile through its role in increasing the frequency and intensity of certain diseases, and the health and mortality impacts resulting from natural disasters. We assess the overall level of risk by taking into consideration a range of diverse risk factors across the many categories in our services range. This diversity of risk is combined with our business strategy and broad geographic footprint helps us mitigate risk and provide protection against the impacts of short-term climate change effects.

Our products and services continue to provide protection for people in our communities against weather and heat-related disease. Besides, we continue to explore opportunities to engage our business partners and encourage them to develop climate resilience and reduce their operational carbon footprint by taking into consideration of different climate-related scenarios, including a "2°C or lower scenario" through the following steps: 為了確保董事會能夠跟上氣候相關事 宜的最新趨勢,我們將提供氣候素質 培訓,以確保其擁有必要的專業知識 及技能來監督氣候相關事宜的管理。 董事會在必要時亦向外部專家尋求專 業意見,以更好地支持決策過程。

環境、社會及管治工作小組在本集團 業務範圍內為整合及解決環境、社會 及管治事宜(包括氣候變化)進行有效 管治。環境、社會及管治工作小組負 責審批本集團的營運排放目標,並會 制定環境、社會及管治基準,同時和 調定環境、社會及管治基準,同時和政 策相對於最佳常規準則所出現的差 距。此外,環境、社會及管治工作, 組與本集團不同營運部門緊密合作, 旨在建立貫徹、更為完善的方法處理 環境、社會及管治的風險事宜,並向 管層匯報。

策略

由於氣候變化風險,對部分疾病發生 的頻密和劇烈程度加劇,加上天災對 健康和人命的影響,氣候變化風險屬 本集團整體風險概況的一部分。評估 整體風險水平時,本集團會考慮到旗 下服務類別中各項不同的風險因素。 不同的風險與我們業務對策相結合, 且地理幅員遼闊,有助我們減輕風 險,在抵禦短期的氣候變化帶來保 護。

本集團的產品和服務繼續為區內人民 提供保護,使他們免受氣候和熱病相 關之苦。此外,我們繼續探索機會, 委託和鼓勵業務夥伴開發適應氣候的 能力,並透過以下步驟,考慮不同氣 候相關情景,包括[攝氏2度或以下情 景」,減少彼等在運作時的碳排放量:

Step 1: Set Future Images Assuming Climate Change Effects

As climate change measures proceeds, there is a possibility that the industry will be exposed to substantial changes, such as stricter policies including the introduction of and increases in carbon pricing, as well as advances in technology and changes in customer awareness.

In light of these climate change effects, based on the International Energy Agency ("IEA") scenarios and others, we developed multiple future images as the external environment that will surround our Group. With regard to the IEA scenarios, we put focus on the 2°C scenario (2DS) and pictured future images in case where climate change measures do not progress and where such measures progress further "Beyond 2°C scenario".

Step 2: Consider the Impacts

We considered the impacts on our Group for each of the future images developed in Step 1. We believe that in such a society, it will be possible to expand carbon dioxide reduction effects.

With regard to effects on raw material procurement and production, introduction of and increases in carbon pricing is anticipated in accordance with the global advance of climate change measures, leading to the possibility of higher raw material procurement and production costs.

On the other hand, in the case where climate change measures are not adequate throughout society, production interruptions and supply chain disruptions are likely to increase as a result of higher frequency and intensification of natural disasters such as flooding.

步驟1:制定假設氣候變化的未來圖像

隨著氣候變化措施的運行,業界可能面對 以下劇變,比如更為嚴謹的政策(包括引入 和調高碳定價),以及科技日新月異和客戶 認知的變化。

鑒於氣候變化的影響,按照國際能源署 (「國際能源署」)的情境及其他因素,我們 已建立多個未來圖像,作為環繞本集團的 外部環境。就國際能源署的情境而言,我 們聚焦於攝氏2度情境(2DS)。即使氣候變 化措施並無進展及相關進展遠超「越過攝氏 2度的情景」,我們亦已描繪將來圖像。

步驟2:考慮影響

我們考慮按步驟1建立的未來圖像對本集團 的影響。我們認為在社區下,有可能擴大 減少二氧化碳排放的影響。

就採購原材料和生產而言,因應全球對氣 候變化的措施日趨完善,可以預料會引入 和調高碳價格,以致原材料採購與生產成 本向上。

另一方面,假若社會上並無設有完備的氣 候變化措施,天災(如水災)發生的次數與 程度將會加劇,使生產受到干擾和供應鏈 中斷。

Step 3: Respond to the Strategies

Our Group will begin promoting the reduction of non-renewable energy in our daily operation. This strategy will allow for flexible and strategic responses to each demand for the regions where the emission factors of purchased electricity consumptions are high. By promoting real carbon emissions reductions throughout the world through comprehensive energy-saving policies and introduction of renewable energy, we are working to achieve zero carbon emission in our business.

We minimize carbon emissions through comprehensive energysaving and introduction of renewable energy. With respect to renewable energy in particular, we have set a new target, achieve a reduction rate for purchased electricity in coming few years.

With regard to the ongoing confirmation of the suitability and progress of the Group's strategies, we believe that we will have opportunities for stable funding and sustainable increases in corporate value through appropriate information disclosure, dialogue with institutional investors and other stakeholders.

Risk Management

Our Group identifies the climate change related risks or to test the existing risk management strategies under climate change with the aid of risk assessment. Hence, the areas where new strategies are needed could be identified.

The risk assessment takes a standard risk-based approach using national data, local information and expert knowledge, which can identify how climate change may compound existing risks or create new ones. The risk assessment is conducted through the following steps:

Step 1: Establish the context

- Objective/goal
- Scale
- Time frame
- Climate change scenario for most climate variables and sea level

步驟3:應對策略

本集團將從在日常營運中,開始提倡減少 使用不可再生能源。透過這策略,對要求 消耗購買電力引致排放因數較高的地區, 更能靈活和具策略應對。通過推行全面節 能政策及引入可再生能源,在全球提倡碳 減排,本集團致力在業務上達到零碳排放。

透過全面節能和引入使用再生能源來減低 碳排放量。尤其是在再生能源課題上,我 們已定下目標,在未來數年縮減購買電力 的比例。

對於持續確定本集團策略的適當性及進 展,我們認為通過適當的資料披露,與機 構投資者和其他權益人展開對話,我們有 機會獲得穩定的基金,企業價值可持續向 上。

風險管理

本集團在風險評估的協助下,辨別氣候變 化的相關風險或在氣候變化下,測試現有 風險管理策略。故此,我們可能識別不同 範疇內所需的新策略。

風險評估採用以風險為基礎的標準方法, 應用國家數據、地方資料和專家知識,能 夠識別氣候變化如何加重當前風險或造成 另一新風險。風險評估按以下步驟實行:

步驟1:建立情境

- 宗旨/目標
- 規模
- 時間框架
- 為多項氣候可變因素和海平面建立氣 候變化情境

Step 2: Identify existing risk (past and current)

- Identify the record of occurrence of climatic hazard in the past in the area
- Risk management strategies in place to tackle future occurrence of the hazard

Step 3: Identify future risk and opportunities

- Explore climate change projections for the selected time frame(s) and emission scenario(s)
- Identify potential hazards
- Investigate whether any existing risk from Step 2 may get worse under future projected changes
- Identify new risks that can emerge under future projected changes

Step 4: Analyse and evaluate risk

 Identify a set of decision areas or systems (i.e., geographical areas, business operation, assets, ecosystems, etc.) that has the potential to be at risk in future

As outlined within the Governance section above, the Group has robust risk management and business planning processes that are overseen by the board of directors in order to identify, assess and manage climate-related risks. The Group engages with government and other appropriate organizations in order to keep abreast of expected and potential regulatory and/or fiscal changes.

We continue to raise awareness of climate change in regard to monitoring of carbon and energy footprint in our daily operation. However, there remains gaps in understanding how such climate risks and opportunities may impact our operations, assets and profits. Our Group assesses how the business addresses climate change risks and opportunities and takes the initiative to monitor and reduce their environmental footprint.

步驟2:識別現有風險(過往和現在)

- 鑒定某個地區發生氣候災難的記錄
- 設下風險管理策略,處理日後災難發生

步驟3:識別日後風險和機遇

- 為選定時間框架和排放情境探索氣候
 變化的預測
- 識別潛在災難
- 基於日後預計的變動,調查步驟2內
 任何現有風險會否惡化
- 基於日後預計的變動,識別可能出現 的新風險

步驟4:分析及評估風險

 識別日後可能承受風險的一套決策範疇或系統(如地理位置、業務營運、 資產、生態系統等)

如上文「管治」一節所述,本集團設有健全 的風險管理和業務規劃過程,會由董事會 監督,藉此識別、評估和管理氣候相關的 風險。本集團與政府及其他合適的組織互 相聯繫,掌握監管及/或財政上預期及潛 在變動的最新發展。

我們繼續提升對氣候變化的認知,並於日 常業務中監測碳和能源排放。然而,氣候 風險與機遇如何影響本集團的營運、資產 和盈利的理解仍存在差距。本集團評估業 務如何應對氣候變化的風險和機遇,並主 動監測和減少對環境的影響。

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

關鍵審計事項

關鍵審計事項是根據我們的專業判斷,認 為對本期綜合財務報表的審計最為重要的 事項。這些事項是在我們審計整體綜合財 務報表及出具意見時進行處理的,且我們 不會對這些事項提供單獨的意見。

Assessing potential impairment of property, plant and equipment and interests in leasehold land and building held for own use under the terminal storage segment	評估碼頭倉儲分部下物業、廠房及設備,以及持作自 用之租賃土地及樓宇權益的潛在減值

The Key Audit Matter 關鍵審計事項	How the matter was addressed in our audit 我們的審計如何處理該事項

At 31 December 2021, the Group's property, plant and equipment and interests in leasehold land and building held for own use accounted for 30% of the total assets of the Group. These assets principally comprised dock and storage facilities and interests in leasehold land and building held for own use.

During the year ended 31 December 2021, the Group recorded a loss before taxation of HK\$8.2 million. In particular, one of the cash-generating units ("CGU") with property, plant and equipment and interests in leasehold land and building held for own use carried at a value of HK\$613 million as at 31 December 2021, recorded a loss before taxation of HK\$1.2 million.

貴集團於二零二一年十二月三十一日的物業、廠房及 設備,以及持作自用之租賃土地及樓宇權益佔 貴集 團總資產的30%。該等資產主要包括碼頭及貯存設施 及持作自用之租賃土地及樓宇。

於截至二零二一年十二月三十一日止年度, 貴集團 錄得820萬港元除税前虧損。具體而言,其中一間擁 有物業、廠房及設備以及持作自用之租賃土地及樓宇 權益(於二零二一年十二月三十一日價值為6.13億港 元)的現金產生單位(「現金產生單位」)錄得除税前虧 損120萬港元。 Our audit procedures to assess potential impairment of property, plant and equipment and interests in leasehold land and building held for own use included the following:

 evaluating management's identification of CGUs and the amounts of property, plant and equipment, interests in leasehold land and building held for own use and other assets allocated to each CGU;

我們就評估物業、廠房及設備,以及持作自用之租賃 土地及樓宇權益的潛在減值的審計程序包括以下程 序:

 評價管理層對現金產生單位的識別,以及歸集於 各個現金產生單位的物業、廠房及設備、持作自 用之租賃土地及樓宇權益及其他資產的金額;

The Key Audit Matter 關鍵審計事項	How the matter was addressed in our audit 我們的審計如何處理該事項
Consequently, management considered that potential impairment of property, plant and equipment and interests in leasehold land and building held for own use existed for this loss making CGU as at 31 December 2021. Management performed impairment assessments for property, plant and equipment and interests in leasehold land and building held for own use using the value in use model and compared the aggregate carrying values of each separately identifiable CGU to which the property, plant and equipment and interests in leasehold land and building held for own use had been allocated with the net present value of the respective future cash flow ("discounted cash flow analyses") to determine the amount of impairment which should be recognised for the year, if any.	 assessing and challenging management's impairment assessment models, which included evaluating the impairment indicators identified by management and assessing the impairment assessment methodology with reference to the requirements of the prevailing accounting standards; obtaining and reviewing the value in use calculations prepared by management and on which the directors' impairment assessments for property, plant and equipment and interests in leasehold land and building held for own use were based; challenging the key assumptions and estimates adopted by management in the discounted cash flow analyses by comparing the significant inputs, which included future revenue and future operating costs with the historical performance, committed contracts on hand, the financial budgets of the Group which had data been approved by the directors and externally derived, which included projected growth rates, projected inflation rates and industry analyses published by external research institutes;
因此,管理層認為於二零二一年十二月三十一日,該 虧損產生現金產生單位可能存在物業、廠房及設備, 以及持作自用之租賃土地及樓宇權益減值。	 評估並質疑管理層的減值評估模式,包括參照現 行會計準則的要求,對管理層識別的減值跡象及 採用的減值評估方法進行評價;

管理層在對物業、廠房及設備,以及持作自用之租賃 土地及樓宇權益進行減值評估時,採用使用價值模 型,通過將物業、廠房及設備,以及持作自用之租賃 土地及樓宇權益所屬的每個可識別現金產生單位的賬 面值總額與各未來現金流量的現時淨值進行對比(「現 金流量折現分析」),以確定將在年內確認的減值金額 (如有)。

- 獲取並檢查管理層編製的,且董事在評估物業、 廠房及設備,以及持作自用之租賃土地及樓宇權 益減值時以此為據的使用價值計算表;
- 通過比較重大輸入數據,包括未來收入及未來經營成本與過往表現、現有承諾合同、董事已批准的 貴集團財務預算,以及外部資料(包括外部研究機構發佈的預計增長率、預計通脹率及行業分析),對管理層在折現現金流量時分析所採用的關鍵假設與估計進行檢驗;

Refer to accounting policy 1(h)(i) and note 10 to the consolidated financial statements	請參閱綜合財務報表的會計政策1(h)(i)及附註(10)
The Key Audit Matter 關鍵審計事項	How the matter was addressed in our audit 我們的審計如何處理該事項
We identified assessing potential impairment of property, plant and equipment and interests in leasehold land and building held for own use as a key audit matter because of the significant management judgement required in making assumptions and estimations, including estimations of future revenue, inflation of operating costs and discount rates applied, which can be inherently uncertain and could be subject to management bias.	 assessing the discount rates applied in the discounted cash flow analyses by benchmarking against those of other similar companies in the same industry; evaluating the historical accuracy of management's value in use calculations by comparing the forecasts at the end of the previous financial year for revenue and operating costs with the actual outcomes in the current year and investigating reasons for any significant differences between the forecast and actual results; engaging our internal valuation specialists to assist us in evaluating the appropriateness of methodology used by management and the discount rate applied in the discounted cash flow forecast supporting the value in use with reference to the requirements of the prevailing accounting standards;
	• performing sensitivity analyses for both the discount rates and future revenue and considering the resulting impact on the impairment assessments and whether there were any indicators of management bias in the selection of assumptions.
由於作出假設及估計需要重大管理層判斷,包括未來 收益估計、經營成本通脹率及貼現率而該等假設與估 計可能存在固有不確定性並可能導致存在管理偏見, 因此我們將評估物業、廠房及設備,以及持作自用之 租賃土地及樓宇權益的潛在減值識別為關鍵審計事 項。	 以同行業內其他類似企業為基準,評估現金流量 折現分析所採用之折現率; 通過將上個財政年度末對收入及經營成本的預測 與本年實際經營結果進行對比,對管理層在過去 所做使用價值計算的準確性進行評價,並調查造 成預測及實際結果之間任何重大差額的原因; 聘請我們的內部評估專家協助我們評估管理層在 編製支持使用價值的折現現金流預測時使用的方 法,就現率是否適當,並參考現行會計準則的要

 對折現率及未來收入進行敏感度分析,並考慮其 對減值評估產生的影響,以及選擇假設是否存在 任何管理偏見的跡象。

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

- 了解與審計相關的內部控制,以設計 適當的審計程序,但目的並非對 貴 集團內部控制的有效性發表意見。
- 評價董事所採用會計政策的恰當性及 作出會計估計和相關披露的合理性。

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence and communicate with them all relationships and other matters that may reasonably be thought to bear on our independence and, where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Notes to the Financial Statements 財務報表附註

[Expressed in Hong Kong dollars unless otherwise indicated] (以港元列示,另有註明者除外)

1 SIGNIFICANT ACCOUNTING POLICIES

(a) Statement of compliance

These financial statements have been prepared in accordance with all applicable Hong Kong Financial Reporting Standards ("HKFRSs"), which collective term includes all applicable individual Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards ("HKASs") and Interpretations issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"), accounting principles generally accepted in Hong Kong and the disclosure requirements of the Hong Kong Companies Ordinance. These consolidated financial statements also comply with the applicable disclosure provisions of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Listing Rules"). Significant accounting policies adopted by the Group are disclosed below.

The HKICPA has issued certain amendments to HKFRSs that are first effective or available for early adoption for the current accounting period of the Group. Note 1(c) provides information on any changes in accounting policies resulting from initial application of these developments to the extent that they are relevant to the Group for the current accounting periods reflected in these financial statements.

(b) Basis of preparation of the financial statements The consolidated financial statements for the year ended 31 December 2021 comprise the Company and its subsidiaries (together referred to as the "Group") and the Group's interest in an associate and a joint venture.

The measurement basis used in the preparation of the financial statements is the historical cost basis except that other investments (see note 1(g)) are stated at their fair value.

Non-current assets are stated at the lower of carrying amount and fair value less costs to sell.

(a) 合規聲明 此等財務報表乃根據所有適用之 《香港財務報告準則》(「香港財務 報告準則」)編製。此統稱詞彙包 括香港會計師公會(「香港會計師 公會」)頒佈之所有適用之個別香 港財務報告準則、《香港會計準 則》(「香港會計準則」)及詮釋、 香港公認會計原則及《香港公司 條例》之披露規定。此等綜合財 務報表亦符合香港聯合交易所有 限公司證券上市規則(「上市規 則」)適用之披露規定。本集團採 用之重大會計政策披露如下。

> 香港會計師公會已頒佈若干香港 財務報告準則之修訂本,於本集 團之當前會計期間首次生效或可 供提前採納。附註1(c)提供因初 次採用該等新訂及經修訂之準則 (與本集團於反映於此等財務報 表之本會計期間相關)所引致之 任何會計政策變動之資料。

(b) 財務報表之編製基準 截至二零二一年十二月三十一日 止年度之綜合財務報表包括本公 司及其附屬公司(統稱「本集團」) 以及本集團於聯營公司及合營企 業之權益。

> 編製財務報表所採用之計算基準 為歷史成本基準,惟按公允值列 賬的其他投資(見附註1(g))除外。

> 非流動資產按賬面值與公允值減 出售成本的較低者列示。

(b) Basis of preparation of the financial statements (continued) The preparation of financial statements in conformity with HKFRSs requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements made by management in the application of HKFRSs that have significant effect on the financial statements and major sources of estimation uncertainty are discussed in note 2.

(c) Changes in accounting policies

The HKICPA has issued certain amendments to HKFRSs that are first effective for the current accounting period of the Group. None of these developments has had a material effect on how the Group's results and financial position for the current or prior periods have been prepared or presented in these financial statements.

The Group has not applied any new standard or interpretation that is not yet effective for the current accounting period.

> 附註2論述管理層在應用對財務 報表有重大影響的香港財務報告 準則時所作的判斷及估計的不確 定性的主要來源。

(c) 會計政策變動

香港會計師公會已頒佈若干對香 港財務報告準則的修訂,在本集 團的當前會計期間首次生效。該 等發展並無對本集團現時或過往 期間的業績及財務狀況的編製方 式或於該等財務報表中的呈現方 式產生重大影響。

本集團並無應用任何尚未於本會 計期間生效之新訂準則或詮釋。

(d) Subsidiaries, controlled structured entities and noncontrolling interests

Subsidiaries are entities (including structured entities) controlled by the Group. The Group controls an entity when it is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. When assessing whether the Group has power, only substantive rights (held by the Group and other parties) are considered.

A structured entity is an entity that has been designed so that voting or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements.

An investment in a subsidiary is consolidated into the consolidated financial statements from the date that control commences until the date that control ceases. Intra-group balances, transactions and cash flows and any unrealised profits arising from intra-group transactions are eliminated in full in preparing the consolidated financial statements. Unrealised losses resulting from intra-group transactions are eliminated in the same way as unrealised gains but only to the extent that there is no evidence of impairment.

Non-controlling interests represent the equity in a subsidiary not attributable directly or indirectly to the Company, and in respect of which the Group has not agreed any additional terms with the holders of those interests which would result in the Group as a whole having a contractual obligation in respect of those interests that meets the definition of a financial liability. For each business combination, the Group can elect to measure any non-controlling interests either at fair value or at the non-controlling interests' proportionate share of the subsidiary's net identifiable assets.

(d) 附屬公司、受控制結構性實體及 非控股權益 附屬公司乃受本集團控制之實體 (包括結構性實體)。當本集團承 受或享有參與實體所得的可變回 報,且有能力透過其對實體的權 力影響該等回報時,則本集團控 制該實體。於評估本集團是否擁 有權力時,僅會考慮其實質權利 (由本集團及其他方持有)。

> 結構性實體指實體經過設計使投 票表決權或類似權利不能作為主 導因素決定誰實質控制實體,例 如當任何投票表決權僅與行政管 理活動有關,相關的業務活動應 當透過合同安排開展。

> 於附屬公司之投資從擁有控制權 日起被合併入綜合財務報表,直 至該控制權終止時為止。集團內 部往來之結餘、交易及現金流量 以及集團內部交易所產生之任何 未變現溢利,均在編製綜合財務 報表時全數抵銷。在無證據顯示 出現減值之情況下,集團內部交 易所產生之未變現虧損,會按與 未變現收益相同之方法抵銷。

> 非控股權益指並非由本公司直接 或間接應佔之附屬公司股權, 就此而言,本集團並無與該等權 益之持有人協定任何額外條款, 以致本集團整體上對該等權益產 生符合財務負債的定義的合約責 任。就各業務合併而言,本集團 可選擇按公允值或彼等於附屬公 司可辨認資產淨值的持股比例計 量任何非控股權益。

(d) Subsidiaries, controlled structured entities and noncontrolling interests (continued)

Non-controlling interests are presented in the consolidated balance sheet within equity, separately from equity attributable to the equity shareholders of the Company. Non-controlling interests in the results of the Group are presented on the face of the consolidated income statement and the consolidated statement of comprehensive income as an allocation of the total profit or loss and total comprehensive income for the year between non-controlling interests and the equity shareholders of the Company. Loans from holders of non-controlling interests and other contractual obligations towards these holders are presented as financial liabilities in the consolidated balance sheet in accordance with notes 1(q) or (t) depending on the nature of the liability.

Changes in the Group's interests in a subsidiary that do not result in a loss of control are accounted for as equity transactions, whereby adjustments are made to the amounts of controlling and non-controlling interests within consolidated equity to reflect the change in relative interests, but no adjustments are made to goodwill and no gain or loss is recognised.

When the Group loses control of a subsidiary, it is accounted for as a disposal of the entire interest in that subsidiary, with a resulting gain or loss being recognised in profit or loss. Any interest retained in that former subsidiary at the date when control is lost is recognised at fair value and this amount is regarded as the fair value on initial recognition of a financial asset or, when appropriate, the cost on initial recognition of an investment in an associate or joint venture.

In the Company's balance sheet, an investment in a subsidiary is stated at cost less impairment losses (see note 1(l)). A controlled structured entity that is directly held by the Company is considered as branch/agent of the Company and the assets and liabilities thereof are accounted for as assets and liabilities of the Company in the Company's balance sheet.

(d) 附屬公司、受控制結構性實體及 非控股權益(續) 非控股權益在綜合資產負債表之 權益項目中與本公司股東應佔權 益分開列示。本集團業績之非控 股權益在綜合損益表及綜合全面 收益表呈列以顯示本年度之溢利 或虧損總額和全面收益總額於非 控股權益與本公司股東之間之分 配。來自非控股權益持有人之貸 款及該等持有人之其他合約性責 任,視乎負債性質根據附註1(q) 或(t)於綜合資產負債表呈列為財 務負債。

> 本集團就並無導致失去附屬公司 控制權的變動按權益交易入賬, 並對綜合權益中控股及非控股權 益的數額作出調整,以表明相關 權益變動,但並未對商譽作出調 整,且並未確認收益或虧損。

> 當本集團失去對附屬公司之控制 權時,入賬為出售於該附屬公司 之所有權益,且所得收益或虧損 於損益表內確認。於控制權喪失 日於該前附屬公司保留的任何權 益均按公允值予以確認,且該數 額被視為金融資產初步確認之公 允值或(倘適用)於聯營公司或合 營企業之投資初步確認之成本。

> 於本公司之資產負債表內,於附 屬公司之投資按成本減去減值虧 損列賬(見附註1(I))。直接由本 公司持有的受控制結構實體被視 為本公司的分公司/代理商,其 資產及負債於本公司資產負債表 中被列入為本公司資產及負債。

1 SIGNIFICANT ACCOUNTING POLICIES (continued) (e) Associates and joint ventures

An associate is an entity in which the Group or Company has significant influence, but not control or joint control, over its management, including participation in the financial and operating policy decisions.

A joint venture is an arrangement whereby the Group or Company and other parties contractually agree to share control of the arrangement, and have rights to the net assets of the arrangement.

An investment in an associate or a joint venture is accounted for in the consolidated financial statements under the equity method, unless it is classified as held for sale (or included in a disposal group that is classified as held for sale). Under the equity method, the investment is initially recorded at cost, adjusted for any excess of the Group's share of the acquisition-date fair values of the investee's identifiable net assets over the cost of the investment (if any). The cost of the investment includes purchase price, other costs directly attributable to the acquisition of the investment, and any direct investment into the associate or joint venture that forms part of the Group's equity investment. Thereafter, the investment is adjusted for the post-acquisition change in the Group's share of the investee's net assets and any impairment loss relating to the investment (see notes 1(f) and (l)(ii)). At each reporting date, the Group assesses whether there is any objective evidence that the investment is impaired. Any acquisition-date excess over cost, the Group's share of the post-acquisition, post-tax results of the investees and any impairment losses for the year are recognised in the consolidated statement of profit or loss, whereas the Group's share of the post-acquisition post-tax items of the investees' other comprehensive income is recognised in the consolidated statement of profit or loss and other comprehensive income.

1 重大會計政策(續)

(e) 聯營公司及合營企業 聯營公司指本集團或本公司對其 管理層具有重大影響力(包括參 與財務及經營政策決策)但並非 控制或共同控制的實體。

> 合營企業是指本集團或本公司及 其他各方以合約方式約定分享對 該安排的控制權的安排,並擁有 該安排的淨資產的權利。

> 於聯營公司或合營企業的投資乃 使用權益法於綜合財務報表入 賬,除非其分類為持作出售(或 包括在分類為特作出售的出售組 別)。根據權益法,投資最初按 成本列賬,並按本集團應佔被投 資方可識別資產淨值於收購日期 的公允值超過投資成本(如有)的 部分進行調整。投資成本包括購 買價,直接歸屬於收購投資的其 他成本,以及作為本集團股權投 資一部分的對聯營公司或合營企 業的任何直接投資(見附註1(f)及 (I)(ii))。其後,投資將根據本集 團應佔被投資方資產淨值的收購 後變動以及與投資相關的任何減 值損失進行調整。於各報告日 期,本集團評估是否存在任何客 觀證據表示投資已減值。任何於 收購日超過成本的部分,本集團 應佔收購被投資方後的比例,被 投資方的税後業績及當年的任何 減值虧損均於綜合損益表確認, 而本集團應佔被投資方的其他全 面收益的收購後除税後項目於綜 合損益及其他全面收益表中確 認。

(e) Associates and joint ventures (continued)

When the Group's share of losses exceeds its interest in the associate or the joint venture, the Group's interest is reduced to nil and recognition of further losses is discontinued except to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the investee. For this purpose, the Group's interest is the carrying amount of the investment under the equity method, together with any other longterm interests that in substance form part of the Group's net investment in the associate or the joint venture, after applying the ECL model to such other long-term interests where applicable (see note 1(l)(ii)).

Unrealised profits and losses resulting from transactions between the Group and its associates and joint venture are eliminated to the extent of the Group's interest in the investee, except where unrealised losses provide evidence of an impairment of the asset transferred, in which case they are recognised immediately in profit or loss.

If an investment in an associate becomes an investment in a joint venture or vice versa, the retained interest is not remeasured. Instead, the investment continues to be accounted for under the equity method.

In all other cases, when the Group ceases to have significant influence over an associate or joint control over a joint venture, it is accounted for as a disposal of the entire interest in that investee, with a resulting gain or loss being recognised in profit or loss. Any interest retained in that former investee at the date when significant influence or joint control is lost is recognised at fair value and this amount is regarded as the fair value on initial recognition of a financial asset (see note 1(g)).

In the Company's balance sheet, investments in associates and joint venture are stated at cost less impairment losses (see note 1(I)(ii)), unless classified as held for sale (or included in a disposal group that is classified as held for sale).

(f) Goodwill

Goodwill represents the excess of

- the aggregate of the fair value of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of the Group's previously held equity interest in the acquiree; over
- (ii) the net fair value of the acquiree's identifiable assets and liabilities measured as at the acquisition date.

When (ii) is greater than (i), then this excess is recognised immediately in profit or loss as a gain on a bargain purchase.

Goodwill is stated at cost less accumulated impairment losses. Goodwill arising on a business combination is allocated to each cash-generating unit, or groups of cash generating units, that is expected to benefit from the synergies of the combination and is tested annually for impairment (see note 1(I)(ii)).

On disposal of a cash generating unit during the year, any attributable amount of purchased goodwill is included in the calculation of the profit or loss on disposal.

(g) Other investments in debt and equity securities The Group's policies for investments in debt and equity securities, other than investments in subsidiaries, are set out below.

Investments in debt and equity securities are recognised/ derecognised on the date the Group commits to purchase/sell the investment. The investments are initially stated at fair value plus directly attributable transaction costs, except for those investments measured at fair value through profit or loss ("FVPL") for which transaction costs are recognised directly in profit or loss. For an explanation of how the Group determines fair value of financial instruments, see note 30(f). These investments are subsequently accounted for as follows, depending on their classification.

 - (i) Investments other than equity investments Non-equity investments held by the Group are classified into one of the following measurement categories:
 - amortised cost, if the investment is held for the collection of contractual cash flows which represent solely payments of principal and interest. Interest income from the investment is calculated using the effective interest method (see note 1(v)(iv)).
 - FVOCI-recycling, if the contractual cash flows of the investment comprise solely payments of principal and interest and the investment is held within a business model whose objective is achieved by both the collection of contractual cash flows and sale. Changes in fair value are recognised in other comprehensive income, except for the recognition in profit or loss of expected credit losses, interest income (calculated using the effective interest method) and foreign exchange gains and losses. When the investment is derecognised, the amount accumulated in other comprehensive income is recycled from equity to profit or loss.
 - FVPL if the investment does not meet the criteria for being measured at amortised cost or FVOCI (recycling). Changes in the fair value of the investment (including interest) are recognised in profit or loss.

(g) Other investments in debt and equity securities (continued)

(ii) Equity investments

An investment in equity securities is classified as FVPL unless the equity investment is not held for trading purposes and on initial recognition of the investment the Group makes an irrevocable election to designate the investment at FVOCI (non-recycling) such that subsequent changes in fair value are recognised in other comprehensive income. Such elections are made on an instrument-by-instrument basis, but may only be made if the investment meets the definition of equity from the issuer's perspective. Where such an election is made, the amount accumulated in other comprehensive income remains in the fair value reserve (non-recycling) until the investment is disposed of. At the time of disposal, the amount accumulated in the fair value reserve (non-recycling) is transferred to retained earnings. It is not recycled through profit or loss. Dividends from an investment in equity securities, irrespective of whether classified as at FVPL or FVOCI, are recognised in profit or loss as other income in accordance with the policy set out in note 1(v)(iv).

(h) Property, plant and equipment

 Property, plant and equipment are stated at cost less accumulated depreciation and impairment losses (see note 1(l)(ii)).

The cost of self-constructed items of property, plant and equipment includes the cost of materials, direct labour, the initial estimate, where relevant, of the costs of dismantling and removing the items and restoring the site on which they are located, and an appropriate proportion of production overheads and borrowing costs (see note 1(x)).

Gains or losses arising from the retirement or disposal of an item of property, plant and equipment are determined as the difference between the net disposal proceeds and the carrying amount of the item and are recognised in profit or loss on the date of retirement or disposal.

Depreciation is calculated to write off the cost of items of property, plant and equipment, less their residual value, if any, using the straight-line method over their estimated useful lives as follows:

– Buildings	20–30 years
 Dock and storage facilities 	5–30 years
 Filling station facilities 	20 years
 Office equipment 	5–10 years
– Motor vehicles	5–10 years
 Leasehold improvements 	Over the term of
	the lease
 Right-of-use assets 	Over the term of
	the lease

Where parts of an item of property, plant and equipment have different useful lives, the cost of the item is allocated on a reasonable basis between the parts and each part is depreciated separately. Both the useful life of an asset and its residual value, if any, are reviewed annually.

(h) Property, plant and equipment (continued)

(ii) Construction in progress represents oil and gas station under construction and pending installation, and is stated at cost less impairment losses (see note 1(l)(ii)). Cost comprises direct costs of construction as well as interest charges, and foreign exchange differences on related borrowed funds to the extent that they are regarded as an adjustment to interest charges, during the periods of construction.

Construction in progress is transferred to property, plant and equipment when the asset is ready for its intended use. No depreciation is provided in respect of construction in progress.

(i) Investment property

Investment properties are interests in land and buildings (including the leasehold property held as right-of-use assets which would otherwise meet the definition of an investment property) held to earn rental income and/or for capital appreciation, rather than for use in the production or supply of goods or services or for administrative purposes; or for sale in the ordinary course of business. Such properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated at cost less accumulated depreciation and any impairment losses (see note 1(I)(ii)).

The Group's investment property is rented out under an operating lease. The investment property is depreciated on a straight-line basis over its estimated useful life as 20–30 years. Any gains or losses on the retirement or disposal of investment properties are recognised in the statement of profit or loss in the year of the retirement or disposal.

(j) Intangible assets

Intangible assets that are acquired by the Group are stated at cost less accumulated amortisation (where the estimated useful life is finite) and impairment losses (see note 1(l)(ii)). Amortisation of club memberships is charged to profit or loss on a straight-line basis over the estimated useful lives of 17 to 24 years.

Both the period and method of amortisation are reviewed annually.

攤銷的期間及方法均會每年進行 檢討。

(k) Leased assets

At inception of a contract, the Group assesses whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Control is conveyed where the customer has both the right to direct the use of the identified asset and to obtain substantially all of the economic benefits from that use.

(i) As a lessee

Where the contract contains lease component(s) and non-lease component(s), the Group has elected not to separate non-lease components and accounts for each lease component and any associated nonlease components as a single lease component for all leases.

At the lease commencement date, the Group recognises a right-of-use asset and a lease liability, except for short-term leases that have a lease term of 12 months or less and leases of low-value assets which, for the Group are primarily laptops and office furniture. When the Group enters into a lease in respect of a low-value asset, the Group decides whether to capitalise the lease on a lease-by-lease basis. The lease payments associated with those leases which are not capitalised are recognised as an expense on a systematic basis over the lease term.

Where the lease is capitalised, the lease liability is initially recognised at the present value of the lease payments payable over the lease term, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, using a relevant incremental borrowing rate. After initial recognition, the lease liability is measured at amortised cost and interest expense is calculated using the effective interest method. Variable lease payments that do not depend on an index or rate are not included in the measurement of the lease liability and hence are charged to profit or loss in the accounting period in which they are incurred.

(i) 作為承租人

倘合約包括租賃部分及非 租賃部分,則本集團選擇 不區分非租賃部分,並就 所有租賃將各租賃部分及 任何相關的非租賃部分入 賬列為單一租賃部分。

1 SIGNIFICANT ACCOUNTING POLICIES (continued) (k) Leased assets (continued)

(i) As a lessee (continued)

The initial fair value of refundable rental deposits is accounted for separately from the right-of-use assets in accordance with the accounting policy applicable to investments in debt securities carried at amortised cost (see notes 1(g)(i) and 1(l)(i)). Any difference between the initial fair value and the nominal value of the deposits is accounted for as additional lease payments made and is included in the cost of rightof-use assets.

The right-of-use asset recognised when a lease is capitalised is initially measured at cost, which comprises the initial amount of the lease liability plus any lease payments made at or before the commencement date, and any initial direct costs incurred. Where applicable, the cost of the rightof-use assets also includes an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, discounted to their present value, less any lease incentives received. The right-of-use asset is subsequently stated at cost less accumulated depreciation and impairment losses (see notes 1(h) and 1(l)(ii)).

(k) Leased assets (continued)

(i) As a lessee (continued)

The lease liability is also remeasured when there is a change in the scope of a lease or the consideration for a lease that is not originally provided for in the lease contract ("lease modification") that is not accounted for as a separate lease. In this case the lease liability is remeasured based on the revised lease payments and lease term using a revised discount rate at the effective date of the modification. The only exceptions are rent concessions that occurred as a direct consequence of the COVID-19 pandemic and met the conditions set out in paragraph 46B of HKFRS 16 Leases. In such cases, the Group has taken advantage of the practical expedient not to assess whether the rent concessions are lease modifications, and recognised the change in consideration as negative variable lease payments in profit or loss in the period in which the event or condition that triggers the rent concessions occurred.

In the consolidated balance sheet, the current portion of long-term lease liabilities is determined as the principal portion of contractual payments that are due to be settled within twelve months after the reporting period.

(k) Leased assets (continued)

(ii) As a lessor

When the Group acts as a lessor, it determines at lease inception whether each lease is a finance lease or an operating lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to the ownership of an underlying assets to the lessee. If this is not the case, the lease is classified as an operating lease.

When a contract contains lease and non-lease components, the Group allocates the consideration in the contract to each component on a relative stand-alone selling price basis. The rental income from operating leases is recognised in accordance with note 1(v)(i).

When the Group is an intermediate lessor, the sub-leases are classified as a finance lease or as an operating lease with reference to the right-of-use asset arising from the head lease. If the head lease is a short-term lease to which the group applies the exemption described in note 1(k)(i), then the Group classifies the sub-lease as an operating lease.

(I) Credit loss and impairment of assets

(i) Credit losses from financial instrument and lease receivables

The Group recognises a loss allowance for expected credit losses ("ECLs") on the financial assets measured at amortised cost (including cash and bank balances, and trade and other receivables) and lease receivables.

Other financial assets measured at fair value are not subject to the ECL assessment.

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Credit losses are measured as the present value of all expected cash shortfalls (i.e. the difference between the cash flows due to the Group in accordance with the contract and the cash flows that the Group expects to receive).

The expected cash shortfalls are discounted using the following discount rates where the effect of discounting is material:

 fixed-rate financial assets, trade and other receivables and contract assets: effective interest rate determined at initial recognition or an approximation thereof;

In measuring ECLs, the Group takes into account reasonable and supportable information that is available without undue cost or effort. This includes information about past events, current conditions and forecasts of future economic conditions.

ECLs are measured on either of the following bases:

- 12-month ECLs: these are losses that are expected to result from possible default events within the 12 months after the balance sheet date; and
- lifetime ECLs: these are losses that are expected to result from all possible default events over the expected lives of the items to which the ECL model applies.

(I) Credit loss and impairment of assets (continued)

 (i) Credit losses from financial instrument and lease receivables (continued) Measurement of ECLs (continued) Loss allowances for trade receivables are always measured at an amount equal to lifetime ECLs.

For all other financial instruments, the Group recognises a loss allowance equal to 12-month ECLs unless there has been a significant increase in credit risk of the financial instrument since initial recognition, in which case the loss allowance is measured at an amount equal to lifetime ECLs.

Significant increases in credit risk

In assessing whether the credit risk of a financial instrument has increased significantly since initial recognition, the Group compares the risk of default occurring on the financial instrument assessed at the balance sheet date with that assessed at the date of initial recognition. In making this reassessment, the Group considers that a default event occurs when (i) the borrower is unlikely to pay its credit obligations to the Group in full, without recourse by the Group to actions such as realising security (if any is held); or (ii) the financial asset is 90 days past due. The Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort

對於所有其他金融工具, 本集團確認相當於12個 月預期信用虧損的虧損撥 備,除非自初始確認以來 金融工具的信貸風險顯著 增加,在這種情況下,虧 損撥備的計算金額等於全 期預期信貸虧損。

信貸風險大幅上升

評估金融工具的信貸風險 自初步確認以來有否大幅 上升時,本集團會比較於 結算日及於初步確認日期 評估的金融工具發生違約 的風險。作出重新評估 時,本集團認為,倘(i)借 款人不大可能在本集團無 追索權採取變現抵押(如持 有)等行動的情況下向本集 團悉數支付其信貸債務; 或(ii)金融資產已逾期90 日,則構成違約事件。本 集團會考慮合理可靠的定 量及定性資料,包括過往 經驗及在無需付出過多成 本或努力下即可獲得的前 瞻性資料。

 - (i) Credit losses from financial instrument and lease receivables (continued)
 Significant increases in credit risk (continued)
 In particular, the following information is taken into account when assessing whether credit risk has increased significantly since initial recognition:
 - failure to make payments of principal or interest on their contractually due dates;
 - an actual or expected significant deterioration in a financial instrument's external or internal credit rating (if available);
 - an actual or expected significant deterioration in the operating results of the debtor; and
 - existing or forecast changes in the technological, market, economic or legal environment that have a significant adverse effect on the debtor's ability to meet its obligation to the Group.

Depending on the nature of the financial instruments, the assessment of a significant increase in credit risk is performed on either an individual basis or a collective basis. When the assessment is performed on a collective basis, the financial instruments are grouped based on shared credit risk characteristics, such as past due status and credit risk ratings.

ECLs are remeasured at each balance sheet date to reflect changes in the financial instrument's credit risk since initial recognition. Any change in the ECL amount is recognised as an impairment gain or loss in profit or loss. The Group recognises an impairment gain or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

 (i) Credit losses from financial instrument and lease receivables (continued)
 Basis of calculation of interest income Interest income recognised in accordance with note 1(v)(v) is calculated based on the gross carrying amount of the financial asset unless the financial asset is credit-impaired, in which case interest income is calculated based on the amortised cost (i.e. the gross carrying amount less loss allowance) of the financial asset.

At each balance sheet date, the Group assesses whether a financial asset is credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable events:

- significant financial difficulties of the debtor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- it becoming probable that the borrower will enter into bankruptcy or other financial reorganisation;
- significant changes in the technological, market, economic or legal environment that have an adverse effect on the debtor; or
- the disappearance of an active market for a security because of financial difficulties of the issuer.

Write-off policy

The gross carrying amount of a financial asset and lease receivable is written off (either partially or in full) to the extent that there is no realistic prospect of recovery. This is generally the case when the asset becomes one-year past due and the Group determines that there is no reasonable expectation of recovery, or the Group determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off.

Subsequent recoveries of an asset that was previously written off are recognised as a reversal of impairment in profit or loss in the period in which the recovery occurs.

(ii) Impairment of other non-current assets

Internal and external sources of information are reviewed at each balance sheet date to identify indications that the following assets may be impaired or an impairment loss previously recognised no longer exists or may have decreased:

- property, plant and equipment;
- investment property;
- right-of-use assets;
- intangible assets;
- investment in an associate;
- investment in a joint venture;
- goodwill; and
- investments in subsidiaries in the Company's balance sheet.

(I) Credit loss and impairment of assets (continued)

(ii) Impairment of other non-current assets (continued)

If any such indication exists, the asset's recoverable amount is estimated. In addition, for goodwill, the recoverable amount is estimated annually whether or not there is any indication of impairment.

Calculation of recoverable amount

The recoverable amount of an asset is the greater of its fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using the pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. Where an asset does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the smallest group of assets that generates cash inflows independently (i.e. a cash-generating unit). A portion of the carrying amount of a corporate asset (for example, head office building) is allocated to an individual cash-generating unit if the allocation can be done on a reasonable and consistent basis, or to the smallest group of cash-generating units if otherwise.

(continued)

- Recognition of impairment losses
 An impairment loss is recognised in profit or loss if the carrying amount of an asset, or the cash-generating unit to which it belongs, exceeds its recoverable amount. Impairment losses recognised in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the cashgenerating unit (or group of units) and then, to reduce the carrying amount of the other assets in the unit (or group of units) on a pro rata basis, except that the carrying value of an asset will not be reduced below its individual fair value less costs of disposal (if measurable) or value in use (if determinable).
- Reversal of impairment losses
 In respect of assets other than goodwill, an impairment loss is reversed if there has been a favourable change in the estimates used to determine the recoverable amount. An impairment loss in respect of goodwill is not reversed.

A reversal of an impairment loss is limited to the asset's carrying amount that would have been determined had no impairment loss been recognised in prior years. Reversals of impairment losses are credited to the profit or loss in the year in which the reversals are recognised.

(iii) Interim financial reporting and impairment Under the Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited, the Group is required to prepare an interim financial report in compliance with HKAS 34, Interim financial reporting, in respect of the first six months of the financial year. At the end of the interim period, the Group applies the same impairment testing, recognition, and reversal criteria as it would at the balance sheet date (see notes 1(I)(i) and (ii)).

Impairment losses recognised in an interim period in respect of goodwill are not reversed in a subsequent period. This is the case even if no loss, or a smaller loss, would have been recognised had the impairment been assessed only at the balance sheet date to which the interim period relates.

(m) Inventories

(i) Inventories

Inventories are carried at the lower of cost and net realisable value.

Cost is calculated using the weighted average cost formula and comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition.

Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

When inventories are sold, the carrying amount of those inventories is recognised as an expense in the period in which the related revenue is recognised. The amount of any writedown of inventories to net realisable value and all losses of inventories are recognised as an expense in the period the writedown or loss occurs. The amount of any reversal of any write-down of inventories is recognised as a reduction in the amount of inventories recognised as an expense in the period in which the reversal occurs.

(ii) Consumable parts

Consumable parts held for repair and maintenance purposes by the Group are stated at cost less any provision for obsolescence.

(n) Contract assets and contract liabilities

A contract asset is recognised when the Group recognises revenue (see note 1(v)) before being unconditionally entitled to the consideration under the payment terms set out in the contract. Contract assets are assessed for ECL in accordance with the policy set out in note 1(I)(i)and are reclassified to receivables when the right to the consideration has become unconditional (see note 1(o)).

A contract liability is recognised when the customer pays consideration before the Group recognises the related revenue (see note 1(v)). A contract liability would also be recognised if the Group has an unconditional right to receive consideration before the Group recognises the related revenue. In such cases, a corresponding receivable would also be recognised (see note 1(o)).

- (o) Trade and other receivables

A receivable is recognised when the Group has an unconditional right to receive consideration. A right to receive consideration is unconditional if only the passage of time is required before payment of that consideration is due. If revenue has been recognised before the Group has an unconditional right to receive consideration, the amount is presented as a contract asset (see note 1(n)).

Trade receivables that do not contain a significant financing component are initially measured at their transaction price. Trade receivables that contain a significant financing component and other receivables are initially measured at fair value plus transaction costs. All receivables are subsequently stated at amortised cost using the effective interest method and including allowance for credit losses (see note 1(l)(i)).

(p) Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and on hand, demand deposits with banks and other financial institutions, and short-term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value, having been within three months of maturity at acquisition. Bank overdrafts that are repayable on demand and form an integral part of the Group's cash management are also included as a component of cash and cash equivalents for the purpose of the consolidated cash flow statement. Cash and cash equivalents are assessed for ECL in accordance with the policy set out in note 1(l)(i).

(q) Interest-bearing borrowings

Interest-bearing borrowings are measured initially at fair value less transaction costs. Subsequent to initial recognition, interest-bearing borrowings are stated at amortised cost using the effective interest method. Interest expense is recognised in accordance with the Group's accounting policy for borrowing costs (see note 1(x)).

(r) Employee benefits

(i) Short-term employee benefits and contributions to defined contribution retirement plans

Salaries, annual bonuses, paid annual leave, contributions to defined contribution retirement plans and the cost of non-monetary benefits are accrued in the year in which the associated services are rendered by employees. Where payment or settlement is deferred and the effect would be material, these amounts are stated at their present values.

(ii) Share-based payments

The fair value of share options granted to employees is recognised as an employee cost with a corresponding increase in a share-based compensation reserve within equity. The fair value is measured at grant date using the binomial model, taking into account the terms and conditions upon which the options were granted. Where the employees have to meet vesting conditions before becoming unconditionally entitled to the options, the total estimated fair value of the share options is spread over the vesting period, taking into account the probability that the options will vest.

During the vesting period, the number of share options that is expected to vest is reviewed. Any resulting adjustment to the cumulative fair value recognised in prior years is charged/credited to the profit or loss for the year of the review, unless the original employee expenses qualify for recognition as an asset, with a corresponding adjustment to the share-based compensation reserve. On vesting date, the amount recognised as an expense is adjusted to reflect the actual number of options that vest (with a corresponding adjustment to the share-based compensation reserve) except where forfeiture is only due to not achieving vesting conditions that relate to the market price of the Company's shares. The equity amount is recognised in the sharebased compensation reserve until either the option is exercised (when it is included in the amount recognised share capital for the shares issued) or the option expires (when it is released directly to retained profits/accumulated losses).

(iii) Share award scheme

For the share award scheme, the Group may purchase its own shares through the trustee of the share award scheme from the open market for the shares to be granted under the share award scheme. (s) Income tax

Income tax for the year comprises current tax and movements in deferred tax assets and liabilities. Current tax and movements in deferred tax assets and liabilities are recognised in profit or loss except to the extent that they relate to items recognised in other comprehensive income or directly in equity, in which case the relevant amounts of tax are recognised in other comprehensive income or in equity, respectively.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax assets and liabilities arise from deductible and taxable temporary differences respectively, being the differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases. Deferred tax assets also arise from unused tax losses and unused tax credits.

Apart from certain limited exceptions, all deferred tax liabilities, and all deferred tax assets to the extent that it is probable that future taxable profits will be available against which the asset can be utilised, are recognised. Future taxable profits that may support the recognition of deferred tax assets arising from deductible temporary differences include those that will arise from the reversal of existing taxable temporary differences, provided those differences relate to the same taxation authority and the same taxable entity, and are expected to reverse either in the same period as the expected reversal of the deductible temporary difference or in periods into which a tax loss arising from the deferred tax asset can be carried back or forward. The same criteria are adopted when determining whether existing taxable temporary differences support the recognition of deferred tax assets arising from unused tax losses and credits, that is, those differences are taken into account if they relate to the same taxation authority and the same taxable entity, and are expected to reverse in a period, or periods, in which the tax loss or credit can be utilised.

(s) Income tax (continued)

The limited exceptions to recognition of deferred tax assets and liabilities are those temporary differences arising from the initial recognition of assets or liabilities that affect neither accounting nor taxable profit (provided they are not part of a business combination), and temporary differences relating to investments in subsidiaries to the extent that, in the case of taxable differences, the Group controls the timing of the reversal and it is probable that the differences will not reverse in the foreseeable future, or in the case of deductible differences, unless it is probable that they will reverse in the future.

The amount of deferred tax recognised is measured based on the expected manner of realisation or settlement of the carrying amount of the assets and liabilities, using tax rates enacted or substantively enacted at the balance sheet date. Deferred tax assets and liabilities are not discounted.

The carrying amount of a deferred tax asset is reviewed at each balance sheet date and is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow the related tax benefit to be utilised. Any such reduction is reversed to the extent that it becomes probable that sufficient taxable profits will be available.

Additional income taxes that arise from the distribution of dividends are recognised when the liability to pay the related dividends is recognised.

Current tax balances and deferred tax balances, and movements therein, are presented separately from each other and are not offset. Current tax assets are offset against current tax liabilities, and deferred tax assets against deferred tax liabilities, if the Company or the Group has the legally enforceable right to set off current tax assets against current tax liabilities and the following additional conditions are met:

- in the case of current tax assets and liabilities, the Company or the Group intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously; or

 - different taxable entities, which, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered, intend to realise the current tax assets and settle the current tax liabilities on a net basis or realise and settle simultaneously.

(t) Trade and other payables

Trade and other payables (including amounts due to related parties) are initially recognised at fair value and are stated at amortised cost unless the effect of discounting would be immaterial, in which case they are stated at invoice amounts.

(u) Provisions and contingent liabilities

Provisions are recognised when the Group has a legal or constructive obligation arising as a result of a past event, it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate can be made. Where the time value of money is material, provisions are stated at the present value of the expenditure expected to settle the obligation.

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, whose existence will only be confirmed by the occurrence or nonoccurrence of one or more future events are also disclosed as contingent liabilities unless the probability of outflow of economic benefits is remote.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, a separate asset is recognised for any expected reimbursement that would be virtually certain. The amount recognised for the reimbursement is limited to the carrying amount of the provision.

(v) Revenue and other income

Income is classified by the Group as revenue when it arises from the sales of goods, the provision of services or the use by others of the Group's assets under leases in the ordinary course of the Group's business.

Revenue is recognised when control over a product or service is transferred to the customer, or the lessee has the right to use the asset, at the amount of promised consideration to which the Group is expected to be entitled, excluding those amounts collected on behalf of third parties. Revenue excludes value added tax or other sales taxes and is after deduction of any trade discounts.

如經濟利益流出之可能性較低, 或無法對有關數額作出可靠之估 計,則會將該責任披露為或然負 債,但經濟利益外流之可能性極 低則除外。如果有關責任須視乎 某宗或多宗未來事件是否發生才 能確定是否存在,則會披露為或 然負債,除非經濟利益外流之可 能性極低。

倘結算撥備所需的部分或全部支 出預期由另一方償還,則就幾乎 確定的任何預期償還確認一項單 獨的資產。就償還確認的金額僅 限於撥備的賬面值。

(v) 收入及其他收益 於本集團業務的日常業務過程 中,本集團將根據租賃銷售貨 品、提供服務或他人使用本集團 資產而產生的收入分類為收益。

> 收入於按本集團預期有權享有之 約定代價金額將產品或服務控制 權轉移至客戶或租賃有權使用資 產時確認,惟不包括代表第三方 收取之金額。收入不包括增值税 或其他銷售税,且已扣除任何貿 易折扣。

(v) Revenue and other income (continued)

Where the contract contains a financing component which provides a significant financing benefit to the customer for more than 12 months, revenue is measured at the present value of the amount receivable, discounted using the discount rate that would be reflected in a separate financing transaction with the customer, and interest income is accrued separately under the effective interest method. Where the contract contains a financing component which provides a significant financing benefit to the Group, revenue recognised under that contract includes the interest expense accreted on the contract liability under the effective interest method. The Group takes advantage of the practical expedient in paragraph 63 of HKFRS 15 and does not adjust the consideration for any effects of a significant financing component if the period of financing is 12 months or less.

Further details of the Group's revenue and other income recognition policies are as follows:

(i) Rental income from operating leases

Rental income receivable under operating leases is recognised in profit or loss in equal instalments over the periods covered by the lease term, except where an alternative basis is more representative of the pattern of benefits to be derived from the use of the leased asset. Lease incentives granted are recognised in profit or loss as an integral part of the aggregate net lease payments receivable.

(ii) Port and transshipment income

Port and transshipment income is recognised upon performance of the services.

(iv) Dividends

- Dividend income from unlisted investments is recognised when the shareholder's right to receive payment is established.

For financial assets measured at amortised cost that are not credit-impaired, the effective interest rate is applied to the gross carrying amount of the asset. For creditimpaired financial assets, the effective interest rate is applied to the amortised cost (i.e. gross carrying amount net of loss allowance) of the asset (see note 1(l)(i)).

(vi) Government grants

Government grants are recognised in the balance sheet initially when there is reasonable assurance that they will be received and that the Group will comply with the conditions attaching to them. 1 SIGNIFICANT ACCOUNTING POLICIES (continued) (w) Translation of foreign currencies

The functional currencies of the Company and its subsidiaries in Hong Kong are Hong Kong dollars. The functional currencies of the Company's subsidiaries in the PRC are Renminbi Yuan ("RMB"). The Group adopted Hong Kong dollars as its presentation currency.

Foreign currency transactions during the year are translated at the foreign exchange rates ruling at the transaction dates. Monetary assets and liabilities denominated in foreign currencies are translated at the foreign exchange rates ruling at the balance sheet date. Exchange gains or losses are recognised in profit or loss.

Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated using the foreign exchange rates ruling at the transaction dates. The transaction date is the date on which the company initially recognises such non-monetary assets or liabilities. Non-monetary assets and liabilities denominated in foreign currencies that are stated at fair value are translated using the foreign exchange rates ruling at the dates the fair value was measured.

The results of operations with functional currency other than Hong Kong dollars are translated into Hong Kong dollars at the exchange rates approximating the exchange rates ruling at the dates of the transactions. Balance sheet items are translated into Hong Kong dollars at the closing exchange rates at the balance sheet date. The resulting exchange differences are recognised in other comprehensive income and accumulated separately in equity in the translation reserve.

On disposal of an operation with functional currency other than Hong Kong dollars, the cumulative amount of the exchange differences relating to that operation is reclassified from equity to profit or loss when the profit or loss on disposal is recognised.

(z) Segment reporting

Operating segments, and the amounts of each segment item reported in the financial statements, are identified from the financial information provided regularly to the Group's most senior executive management for the purposes of allocating resources to, and assessing the performance of, the Group's various lines of business and geographical locations.

Individually material operating segments are not aggregated for financial reporting purposes unless the segments have similar economic characteristics and are similar in respect of the nature of products and services, the nature of production processes, the type or class of customers, the methods used to distribute the products or provide the services, and the nature of the regulatory environment. Operating segments which are not individually material may be aggregated if they share a majority of these criteria.

2 ACCOUNTING JUDGEMENTS AND ESTIMATES

The critical accounting judgements in applying the Group's accounting policies and key sources of estimation uncertainty are as follows:

(i) Impairment of non-financial assets

The Group reviews the carrying amounts of noncurrent assets, including property, plant and equipment, investment property, interests in leasehold land and buildings held for own use, intangible assets, interest in an associate and interest in a joint venture, at each balance sheet date to determine whether there is objective evidence of impairment. When indication of impairment is identified, management prepares discounted future cash flow to assess the differences between the carrying amount and value in use and provides for impairment loss. Any change in the assumptions adopted in the cash flow forecasts would increase or decrease in the provision of impairment loss and affect the Group's financial position.

2 會計判斷及估計

No operating segments have been aggregated to form the following reportable segments.

- Trading: this segment represents the Group's trading of oil and petrochemical products business carried out in the PRC and Hong Kong.

(b) Segment reporting (continued)

(i) Segment results, assets and liabilities

For the purposes of assessing segment performance and allocating resources between segments, the Group's senior executive management monitors the results, assets and liabilities attributable to each reportable segment on the following basis:

Segment assets include all tangible, intangible assets and current assets with the exception of investments in subsidiaries and other corporate assets. Segment liabilities include trade and other payables and contract liabilities and lease liabilities attributable to the individual segments and bank loans managed directly by the segments.

Revenue and expenses are allocated to the reportable segments with reference to revenue generated by those segments and the expenses incurred by those segments or which otherwise arise from the depreciation or amortisation of assets attributable to those segments.

The measure used for reporting segment (loss)/ profit is "(loss)/profit before taxation", i.e. "adjusted (losses)/earnings before taxes". To arrive at "(loss)/ profit before taxation", the Group's (losses)/earnings are further adjusted for items not specifically attributed to individual segments, such as head office or corporate administration costs.

In addition to receiving segment information concerning (loss)/profit before taxation, management is provided with segment information concerning revenue, interest income, finance costs, depreciation and amortisation and recognition of loss allowance on trade and other receivables.

Changes in the subjective input assumptions could materially affect the fair value estimate.

There were no market conditions associated with the share option grants. 預期波幅乃基於緊隨授出 當日前過往年度本公司每 周股價的統計分析。該計 算結果乃假設購股權於整 段有效期內之預期波幅與 本公司股份之歷史波幅兩 者間不存在重大差異。主 觀輸入值假設的變化會對 公允值估計造成重大影響。

(e) Capital management

The Group's primary objectives when managing capital are to safeguard the Group's ability to continue as a going concern, so that it can provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

The Group monitors its capital structure on the basis of a net debt-to-capital ratio. For this purpose the Group defines net debt as total debt (which includes interestbearing loans and borrowings), less cash and bank balances. Capital comprises all components of equity, plus net debt.

During 2021, the Group's strategy, which was unchanged from 2020, was to maintain the net debt-to-capital ratio at an appropriate level. In order to maintain or adjust the ratio, the Group will consider and may adjust the amount of dividends paid to shareholders, issue new shares, return capital to shareholders, raise new debt financing or sell assets to reduce debt.

The net debt-to-capital ratio (as define above) was 0.95 (2020: 0.82) as at 31 December 2021.

Neither the Company nor any of its subsidiaries are subject to externally imposed capital requirements.

30 FINANCIAL RISK MANAGEMENT AND FAIR VALUES OF FINANCIAL INSTRUMENTS

Exposure to credit, liquidity, interest rate, currency and commodity price risk arises in the normal course of the Group's business. The Group's exposure to these risks and the financial risk management policies and practices used by the Group to manage these risks are described below.

(a) Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in a financial loss to the Group. The Group's credit risk is primarily attributable to trade receivables and cash and bank balances.

29 資本及儲備(續) (e) 股本管理

本集團之基本目標為管理股本以 保障本集團之持續營運之能力, 以使其能向股東提供回報及向其 他相關人士提供利益,並保持最 佳之資本架構以降低資本成本。

本集團會以淨負債對資本比率為 基準監察其資本架構。就此,本 集團按總負債(包括計息貸款及 借貸)減現金及銀行結餘計算淨 負債。資本包括所有權益部分及 淨負債。

於二零二一年,本集團之策略與 二零二零年一樣,就是維持其淨 負債與股本的比率於適當水平。 為了維持或調整該比率,本集團 將考慮及可能調整派付予股東之 股息金額、發行新股、退回股本 予股東、籌集新債項融資或出售 資產以減少債項。

於二零二一年十二月三十一日, 淨負債對資本比率(定義見上文) 為0.95(二零二零年:0.82)。

本公司及其任何附屬公司概不受制於外界所施加之資本規定。

30 財務風險管理及金融工具公允值

信貸、資金流動性、利率、貨幣及商 品價格風險會於本集團之一般業務進 程中產生。該等風險會受本集團之財 務管理政策及常規(見下文)所管理。

(a) 信貸風險 信貸風險指交易對手將違反其合 約責任而導致本集團產生財務虧 損之風險。本集團之信貸風險主 要歸因於貿易應收賬款以及現金 及銀行結餘。

(a) Credit risk (continued)

Trade receivables

The Group's exposure to credit risk is influenced mainly by the individual characteristics of each customer rather than the industry and country in which customers operate and therefore significant concentration of credit risk primarily arise when the Group has significant exposure to individual customers. At the balance sheet date, the Group has a certain concentration of credit risk as 97% (2020: 96%) of the total trade receivables was due from the Group's five largest customers.

Individual credit evaluations are performed on all customers requiring credit over a certain amount. These evaluations focus on the customer's past history of making payments when due and current ability to pay, and take into account information specific to the customer as well as pertaining to the economic environment in which the customer operates. Trade receivables are due within 30-180 days from the date of billing. Debtors with balances that are more than one month past due are requested to settle all outstanding balances before any further credit is granted. Normally, the Group does not obtain collateral from customers.

(a) 信貸風險(續) 貿易應收賬款

本集團所面臨之信貸風險,主要 受各客戶之個別特色所影響,而 非客戶經營所在之行業及國家, 故集中信貸風險主要在本集團面 臨個別客戶之重大風險時產生。 於結算日,本集團之五大客戶佔 貿易應收賬款總額之97%(二零 二零年:96%),故承受一定程 度之信貸集中風險。

對於所有要求超過若干信貸金額 之客戶均會進行個別信貸評估。 此等評估針對客戶過往到期還款 記錄及現時之還款能力,並考慮 客戶之個別資料及與客戶經營所 在經濟環境相關之資料。貿易應 收賬款由發出賬單當日起計30至 180日內到期。債務人如有逾期 一個月以上之結餘,則須全數清 償有關結餘後方可再獲授信貸。 本集團一般不會向客戶收取抵押 品。

(a) Credit risk (continued)

Trade receivables (continued)

The Group measures loss allowances for trade receivables at an amount equal to lifetime ECLs. To measure the lifetime ECLs, the Group distinguishes the trade receivables by different customers and by segments. The Group considers first whether any trade receivable due from an individual customer requires specific provisions. Credit loss rates are assigned to the trade receivable by reference to various gualitative and guantitative factors such as market default rate of the industry in which the customer operates and the credit ratings, historical default experience and the financial position of the customer. adjusted for other factors, where applicable, to reflect the current and forward-looking information specific to the customer and on the macroeconomic conditions which might affect the customer's ability to settle the trade receivable. Under this approach, ECL of \$5,000,000 was recognised for trade receivable amounting to \$344,082,000 due from a customer of the Group for the year ended 31 December 2021. The management is of the opinion that the ECL of the remaining trade receivables of \$19,075,000 were immaterial to the Group's financial statements.

Movement in the loss allowance account in respect of trade receivables during the year is disclosed in note 20(b).

(a) 信貸風險(續)

貿易應收賬款(續) 木集團按相等於全期

本集團按相等於全期預期信貸虧 損之金額計量貿易應收賬款之 虧損撥備。本集團按不同客戶及 分部區分貿易應收款項,以計量 全期預期信貸虧損。本集團首先 考慮是否有任何應收個人客戶的 貿易應收款項需要特別撥備。, 信貸虧損率是參照各項定性及定 量因素分配給貿易應收款項的, 如顧客經營之行業的市場違約率 及信貸評級、歷史違約經歷及客 戶的財務狀況,並在適用時對其 他因素進行調整,以反映客戶特 定的當前和前瞻性信息以及可能 影響客戶結算貿易應收款項能力 的宏觀經濟條件。在此方法下, 截至二零二一年十二月三十一 日止年度,應收本集團一個客戶 的貿易應收款項為344,082,000 元,確認了5,000,000元的預 期信貸虧損。管理層認為其餘 19,075,000元的貿易應收款項的 預期信貸虧損對本集團的財務報 表並不重大。

年內有關貿易應收賬款之虧損撥 備賬之變動於附註20(b)披露。

(a) Credit risk (continued)

Other financial assets measured at amortised cost

Other financial assets measured at amortised cost mainly consist of other receivables. These mainly comprised of deposits and other receivables due from third parties. The Group's exposure to credit risk is influenced mainly by the individual characteristics of each debtor. In determining the ECL, the Group has taken into account the credit ratings, historical default experience and the financial position of the counterparties, adjusted for factors, where applicable, that are specific to the debtors and macroeconomic conditions of the industry in which the debtors operate, in estimating the probability of default of each of these financial assets occurring within their respective loss assessment time horizon, as well as the loss upon default in each case. During the year ended 31 December 2021, lifetime ECL of \$8,787,000 was fully recognised for other receivables due from a debtor that was in financial difficulty (2020: \$Nil).

Cash and bank balances

In respect of cash and bank balances, the Group limits its exposure to credit risk by placing deposits with financial institutions that meet the established credit rating or other criteria. Given these high credit ratings, management does not expect any counterparty to fail to meet its obligations. As at 31 December 2021, the Group has a certain concentration of credit risk as 56% of total cash and bank balances were deposited with a financial institution in Hong Kong (2020: 44%).

(a) 信貸風險(續)

按攤銷成本計量的其他金融資產 按攤銷成本計量的其他金融資產 主要包括其他應收款項。其中 主要包括應收第三方的按金及其 他應收款項。本集團的信貸風險 主要受各債務人之個別特徵所影 響。在確定預期信貸虧損時,本 集團考慮了信貸評級、歷史違約 經歷及交易方的財務狀況,並在 適用時根據債務人的具體因素及 債務人經營的行業之宏觀經濟狀 況,以估計每項金融資產在其各 自損失評估時間範圍內發生違約 的概率,以及每種情況下的違約 虧損。截至二零二一年十二月 三十一日止年度, 8,787,000元 的全期預期信貸虧損全額確認為 應收一個處於財務困難中的債 務方的其他應收款項(二零二零 年:無)。

現金及銀行結餘

就現金及銀行結餘,本集團透過 將存款存放於符合既定信貸評級 或其他標準之金融機構,限制其 所承受之信貸風險。鑒於信貸評 級高,故管理層預期不會有任何 交易對手無法盡其責任。於二零 二一年十二月三十一日,本集團 之現金及銀行結餘總額之56% 存放於一家位於香港之金融機構 (二零二零年:44%),因此承受 一定程度之信貸集中風險。

(b) Liquidity risk

Individual operating entities within the Group are responsible for their own cash management, including the short-term investment of cash surpluses and the raising of loans to cover expected cash demands, subject to approval by the Company's board when the borrowings exceed certain predetermined levels of authority. The Group's policy is to regularly monitor current and expected liquidity requirements to ensure that it maintains sufficient reserves of cash and adequate committed lines of funding from major financial institutions to meet its liquidity requirements in the short and longer term.

The following table details the remaining contractual maturities at the balance sheet date of the Group's non-derivative financial liabilities, which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates or, if floating, based on rates current at the balance sheet date) and the earliest date the Group can be required to pay:

(b) 資金流動性風險

本集團旗下之個別營運實體負有 自行管理現金之責任,包括將現 金盈餘作短期投資及籌措貸款以 應付預期現金需求,惟倘借貸款 過預先釐定之若干授權水平時, 須取得本公司董事會之批准。本 集團之政策為定期監察現時及預 期之流動性需求,以確保其維持 足夠現金儲備及來自主要金融機 構之足夠承諾信貸融資,以達至 其短期及較長期流動性需求。

(c) Interest rate risk

Interest rate profile

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Group's interest rate risk arises primarily from bank loans. The Group's bank loans at 31 December 2021 were issued at fixed rates and therefore did not expose the Group to cash flow interest rate risk. The Group's interest rate profile as monitored by management is set out in (i) below.

30 財務風險管理及金融工具公允值(續)

(c) 利率風險

利率風險為一項金融工具之公允 值或未來現金流量將因市場利 率改變而波動所帶來的風險。本 集團之利率風險主要來自銀行貸 款。本集團於二零二一年十二月 三十一日之銀行貸款按固定利率 計息,因而並無使本集團面臨現 金流利率風險。本集團之利率概 況由管理層監控並載列於下文第 (i)項。

Total borrowings	借貸總值		796,169		823,576

The Group's bank balances are short-term in nature, and potential variations in interest rates do not have a significant impact on the results of the Group. 本集團的銀行結餘為短期性質, 利率的任何潛在變動均不會對本 集團的業績造成重大影響。

(d) Currency risk

(i) Foreign currency transactions

The Group is exposed to currency risk primarily through billings of (i) storage and warehousing income and (ii) port and transshipment income that are denominated in a currency other than the functional currency of the operations to which they relate. The currency giving rise to this risk is primarily United States dollars ("USD").

As the Hong Kong dollar ("HKD") is pegged to the USD, the Group considers the risk of movements in exchange rates between the HKD and the USD to be insignificant.

(ii) Recognised assets and liabilities

In respect of trade receivables and deposits held in currencies other than the functional currency of the operations to which they relate, the Group ensures that the net exposure is kept to an acceptable level, by buying or selling foreign currencies at spot rates where necessary to address short-term imbalances.

All the Group's borrowings are denominated in the functional currency of the entity taking out the loan. Given this, management does not expect that there will be any significant currency risk associated with the Group's borrowings.

(d) 貨幣風險

(i) 外幣交易

本集團主要由於(i)貯存及倉 庫收入及(ii)港口及轉輸收 入之賬款貨幣與該等經營 業務之功能貨幣有所差異 而須承擔貨幣風險。構成 是項風險之貨幣主要為美 元(「美元」)。

由於港元(「港元」)與美元 掛鉤,故本集團認為港元 與美元之間匯率變動的風 險並不重大。

(ii) 已確認資產及負債

至於以有關業務之功能貨 幣以外之貨幣持有之貿易 應收賬款及存款,本集團 會在出現短期的不平衡 時,以現貨匯率買入或賣 出外匯,確保淨風險承擔 維持在一個可接受水平。

本集團之所有借貸均以借 取貸款之實體之功能貨幣 計值。因此,管理層並不 預期本集團之借貸會帶來 任何重大之貨幣風險。

Fair value hierarchy

The following table presents the fair value of the Group's financial instruments measured at the end of the reporting period on a recurring basis, categorised into the three-level fair value hierarchy as defined in HKFRS 13, Fair value measurement. The level into which a fair value measurement is classified is determined with reference to the observability and significance of the inputs used in the valuation technique as follows:

- Level 1 valuations: Fair value measured using only Level 1 inputs i.e. unadjusted quoted prices in active markets for identical assets or liabilities at the measurement date.
- Level 2 valuations: Fair value measured using Level 2 inputs i.e. observable inputs which fail to meet Level 1, and not using significant unobservable inputs. Unobservable inputs are inputs for which market data are not available.
- Level 3 valuations: Fair value measured using significant unobservable inputs.

As at 31 December 2021 and 2020, the only financial instruments of the Group carried at fair value were other investments (See note 15). These instruments are measured at fair value on a recurring basis and their fair value measurements fall into Level 3 of the fair value hierarchy described above.

During the year ended 31 December 2021, there were no transfers between Level 1 and Level 2, or transfers into or out of Level 3. The Group's policy is to recognise transfers between levels of fair value hierarchy as at the end of the reporting period in which they occur.
